Jewish Roots, Canadian Soil Rebecca Margolis, 2011-02-28 Looking at Montreal's Jewish community during the first half of the twentieth century, Margolis explores the lives and works of activists, writers, scholars, performers, and organizations that fuelled a still-thriving community. She also considers the foundations and development of Yiddish cultural life in Montreal in its interaction with broader issues of diasporic Jewish culture. COBOL with Style Louis J. Chmura, Henry F. Ledgard, 1976 Inspired by the *Elements of Style* by Strunk and White--in that the authors address those COBOL programmers who similarly value rigor, conciseness, and clarity when writing carefully

While rules of style do restrict the programmer, they also enable programmers to focus creativity on the deeper issues in programming. This book is designed as a guide to better COBOL programming, especially for those programmers who have an interest in improving software quality.

Chess Skill in Man and Machine P. W. Frey, 2012-12-06 Ten years of intensive effort on computer chess have produced notable progress. Although the background information and technical details that were written in 1975 for the first edition of this book are still valid in most essential points, hardware and software refinements have had a major impact on the effectiveness of these ideas. The current crop of chess machines are performing at unexpectedly high levels. The approach epitomized by the series of programs developed by David Slate and Larry Atkin at Northwestern in the middle 1970s (i. e. , a sophisticated search algorithm using very little chess knowledge) was expected to reach an asymptotic level of performance no higher than that of a class A player (USCF rating between 1800 and 2000). This perspective was argued quite vigorously by Eliot Hearst in Chapter 8 of the first edition and was held at that time by many chess experts. Subsequent events have clearly demonstrated that the asymptotic performance level for this type of program is at least as high as the master level (USCF rating between 2200 and 2400). Current discussions now focus upon whether the earlier reservations were wrong in principle or simply underestimated the asymptote. If there is a real barrier which will prevent this type of program from attaining a world championship level of performance, it is not evident from the steady progress which has been observed during the last decade.
