Accounting for Fundamentalisms

Accounting for Fundamentalisms features treatments of fundamentalist movements, groups that often make headlines but are rarely understood, as part of the multivolume Fundamentalism Project. This book remains a standard reference source for comprehending the dynamics of fundamentalist movements around the world. Surveying fundamentalist movements in Christianity, Judaism, Islam, Hinduism, Sikhism, and Buddhism, the contributors to Accounting for Fundamentalisms describe the organization of these movements, their leadership and recruiting techniques, and the ways in which their ideological programs and organizational structures shift over time in response to changing political and social environments.

Parliamentary Debates

This volume collects twenty-nine published and unpublished papers by the linguist James Gair, considered the foremost western scholar of the Sri Lankan languages Sinhala and Jaffna Tamil. Ranging over thirty years, his work also considers issues in a variety of Indian languages, including Hindi, Marathi, Tamil, Malayalam, and Bengali. The collection reflects the wide range of Gair's interests, from morpho-syntactic questions to questions regarding historical and areal linguistics, especially language contact and diglossia, and extending to language acquisition. By collecting these papers and making them newly accessible, this volume will provide an important resource not only for scholars of these languages but for linguists interested in the theoretical issues Gair explores.

Studies in South Asian Linguistics

This book brings together, for the first time, studies of the professionalisation of accountancy in key constituent territories of the British Empire. The late nineteenth century was a period of intensive activity in terms of both imperialism and professionalisation. A team of expert contributors has examined profession-state engagements between Britain, on the one hand and Canada, South Africa, Australia, Nigeria, Malaysia, Sri Lanka, Jamaica, Trinidad and Tobago, India and Kenya, and the other with a view to assessing how the organizations of accountancy in the colonies was affecting the metropolitan profession and state agents- and vice versa. Their contributions highlight the peculiarities of the professionalization processes in variant

social, economic and political environments linked together by the relays of empire, prompting reflection on both the common and disparate dynamics involved. This book has numerous objectives, including giving historical insight and focus on countries that provide contrasting and variant examples of the uptake of the \"British model\"

This collection charts the evolution of grammatical variation in Englishes from the Late Middle English to the present, using corpus linguistic tools to address divergence and convergence in local and global perspectives. The book considers both diachronic and synchronic perspectives in grammatical variation across varieties of English across the UK, North America, Europe, Africa, and Asia. The volume reflects on the questions of whether patterns of variation diverge or converge and to what extent catalysts for change are shared in time and space. Chapters look at different factors in grammatical variation at both the macro and micro level, investigating specific linguistic and grammatical features but also at wider phenomena in contact linguistics, social patterns, social networks, and media-based corpora. Chapters progress from the local to the global, all with an eye toward using the latest methodological approaches from corpus linguistics to shed light on the affordances of data-informed methods to study grammatical change and the possibilities for future research. This book will be of interest to students and scholars in sociolinguistics, corpus linguistics, and World Englishes.
