The SME Business Guide to Fraud Risk Management Robert James Chapman, 2022-04-27 All organisations are affected by fraud, but disproportionately so for SMEs given their size and vulnerability. Some small businesses that have failed to manage business fraud effectively have not only suffered financially but also have not survived. This book provides a guide for SMEs to understand the current sources of business fraud risk and the specific risk response actions that can be

taken to limit exposure, through the structured discipline of enterprise risk management. The book provides: A single-source reference: a description of all of the common fraud types SMEs are facing in one location. An overview of enterprise risk management: a tool to tackle fraud (as recommended by the Metropolitan Police Service and many other government-sponsored organisations). Illustrations of fraud events: diagrams/figures (where appropriate) of how frauds are carried out. Case studies: case studies of the fraud types described (to bring the subject to life and illustrate fraud events and their perpetrators) enabling readers to be more knowledgeable about the threats. Sources of support and information: a description of the relationship between the government agencies and departments. What to do: 'specific actions' to be implemented as opposed to just recommending the preparation of policies and processes that may just gather dust on a shelf. The book gives SMEs a much better understanding of the risks they face and hence informs any discussion about the services required, what should be addressed first, in what order should remaining requirements be implemented and what will give the best value for money.

Reporting Intellectual Property Crime U.s. Department of Justice,2016-06-09 Although individuals or companies can pursue civil remedies to address violations of their intellectual property rights, criminal sanctions are often warranted to ensure sufficient punishment and deterrence of wrongful activity. Congress has continually expanded and strengthened criminal laws for violations of intellectual property rights to protect innovation, to keep pace with evolving technology and, significantly, to ensure that egregious or persistent intellectual property violations do not merely become a standard cost of doing business for defendants.
