

Virtual Learning Environments Using Choosing And Developing Your Vle

Martin Weller

Virtual Learning Environments Martin Weller, 2007-05 Full with case studies and advice, this book examines how virtual learning environments can be successfully deployed for effective teaching.

Virtual Learning Environments Martin Weller, 2007-05-01 Virtual learning environments are widely spread in higher education, yet they are often under utilised by the institutions that employ them. This book addresses the need to move beyond thinking about the VLE simply in terms of the particular package that an institution has adopted, and viewing it as a significant educational technology that will shape much of the teaching and learning process in the coming years. Considering how virtual learning environments can be successfully deployed and used for effective teaching, it sets out a model for effective use, focussing on pedagogic application rather than a specific technology, and seeks to provide a bridge between pedagogical approaches and the tools educators have at their disposal. It contains essential advice for those choosing a VLE and encourages all those involved in the deployment of a VLEs to use them more productively in order to create engaging learning experiences.

Developments in Virtual Learning Environments and the Global Workplace Swartz, Stephanie, Barbosa, Belem, Crawford, Izzy, Luck, Susan, 2021-06-11 Although institutions of higher education have recognized the need for preparing their graduates for a digitalized, global workplace, these efforts have been sporadic, individualized, and varied from discipline to discipline. Nevertheless, over the past 10 years, trends such as "double classrooms," "inverted classrooms," and "collaborative online international learning" (COIL) have gained traction at universities across the globe. With the emergence of the COVID-19 pandemic in 2020, efforts to engage students in the use of digital tools and virtual collaborative teamwork increased tenfold. Creative and innovative virtual learning environments (VLEs) have emerged, and instructors have used them to connect with their students much more frequently. The holistic nature of virtual learning, its impact on employability, and the development of global citizenry have become prime areas of research amongst the digital education landscape. Now more than ever, it is essential to look at virtual learning environments and how they can be used to prepare students and employees for the opportunities and challenges of a global, digital workplace. Developments in Virtual Learning Environments and the Global Workplace provides readers with a rationale and tool kit for facilitating virtual learning in a wide variety of contexts in response to the opportunities and challenges presented by the digital global workplace. How to Write a Good Dissertation A guide for University Undergraduate Students LornaMarie,2018-05-28 *How to Write a Good Dissertation - A Guide for University Undergraduate Students* is an essential reference guide for university undergraduate student and anyone who wishes to write at professional level. Every undergraduate student will at some point be required to write a dissertation, project, a portfolio or thesis. Most of the chapters cover topics every student will find useful regardless of their course of study. This book covers essential policies, guidelines and procedures set out in the code of practice for writing projects in most reputable universities around the world.

Technology Alex Lazinica,Carlos Tavares Calafate,2009-10-01 The widespread deployment and use of Information Technologies (IT) has paved the way for change in many fields of our societies. The Internet, mobile computing, social networks and many other advances in human communications have become essential to promote and boost education, technology and industry. On the education side, the new challenges related with the integration of IT technologies into all aspects of learning require revising the traditional educational paradigms that have prevailed for the last centuries. Additionally, the globalization of education and student mobility requirements are favoring a fluid interchange of tools,

methodologies and evaluation strategies, which promote innovation at an accelerated pace. Curricular revisions are also taking place to achieve a more specialized education that is able to respond to the society's requirements in terms of professional training. In this process, guaranteeing quality has also become a critical issue. On the industrial and technological side, the focus on ecological developments is essential to achieve a sustainable degree of prosperity, and all efforts to promote greener societies are welcome. In this book we gather knowledge and experiences of different authors on all these topics, hoping to offer the reader a wider view of the revolution taking place within and without our educational centers. In summary, we believe that this book makes an important contribution to the fields of education and technology in these times of great change, offering a mean for experts in the different areas to share valuable experiences and points of view that we hope are enriching to the reader. Enjoy the book!

Task-Based Language Learning and Teaching with Technology Michael Thomas, Hayo Reinders, 2013-03-14 This edited collection considers the relationship between task-based language teaching (TBLT) and technology-enhanced learning. TBLT is concerned with a number of macro-tasks such as information gathering and problem-solving as well as evaluative tasks, all of which are increasingly available via online and Web-based technologies. Technology Enhanced Learning refers to a broad conception of technology use in the language classroom and incorporates a range of interactive learning technologies such as Interactive Whiteboards and mobile learning devices. The popularity of Web 2.0 technologies (blogs, wikis, social networking sites, podcasting, virtual worlds), as well as practical applications of mobile learning, place a fresh emphasis on creating project-orientated language learning tasks with a clear real-world significance for learners of foreign languages. This book examines the widespread interest in these new technology-enhanced learning environments and looks at how they are being used to promote task-based learning. This book will appeal to practitioners and researchers in applied linguistics, second language acquisition and education studies.

Virtual Theology, Faith and Adult Education Ros Stuart-Buttle, 2013-07-29 Online learning is a key feature of the contemporary educational landscape and has entered mainstream policy, provision and practice. But if online education is to reach mature development and evaluation, it must be open to critical appraisal. This book considers the implementation of online learning within adult theological education. This can be an area of challenge or contention, especially when established academic practices and cherished values are seen as threatened when handed over to online delivery. This opens questions about theology, pedagogy and online education. Does online teaching and learning bring or demand a new or transformed (disruptive) pedagogy or does it result in maintenance or replication (sustaining) of traditional values and existing practices? What might the opportunities and benefits be? Who stands to gain? Who stands to lose? And what evidence is there to evaluate the quality of 'doing theology' online? This book examines a long-standing programme of continuing professional development delivered fully online to adult practitioners working across Christian education and ministry settings. It builds upon the author's international experience as an online educator for over a decade. Key themes relate adult learning to theological pedagogy, authority, and online community. The concept of interruptive pedagogy is presented as an interpretative model to critically appraise an approach to online education that draws on the best theological tradition yet also looks to the future.

Critical CALL - Proceedings of the 2015 EUROCALL Conference, Padova, Italy Francesca Helm, Linda

Bradley, Marta Guarda, Sylvie Thouësny, 2015-12-02 The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term 'critical' has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become 'naturalized' and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.
