Nael G. Bunni

FIDIC - A Guide for Practitioners Axel-Volkmar Jaeger, Götz-Sebastian Hök, 2009-11-11 In 1999, a suite of three new conditions of contract was published by FIDIC, following the basic structure and wording harmonised and updated around the previous FIDIC Design-Build and Turnkey Contract (the 1992 “Orange Book”). These conditions, known as the “FIDIC rainbow”, were the Conditions of Contract for: 1 Construction, the so-called Red Book, for works designed by the Employer 1 Plant and Design-Build, the so-called Yellow Book, for works designed by the Contractor 1 EPC/Turnkey Projects, the so-called Silver Book, for works designed by the Contractor The first is intended for construction works where the Employer is responsible for the design, as for per the previous so-called Red Book 4th Edition (1987), with an important role for the Engineer. The other two conditions of contract are intended for situations when the Contractor is responsible for the design. The Plant and Design-Build Contract has the traditional Engineer while the EPC/Turnkey Contract has a two-party arrangement, generally with an Employer’s Representative as one of the parties.

The FIDIC Forms of Contract Nael G. Bunni, 2013-02-05 In September 1999, FIDIC introduced its new Suite of Contracts, which included a “new” Red, Yellow, Silver and Green forms of contract. The “new” Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them. Important features of this book include: · background and concepts of the various forms of contract; · a detailed comparison of the wording of the 1999 three main forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose; · analysis of the rights and obligations of the parties involved in the contract and the allocation of risks

concerned; · a range of ‘decision tree’ charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards; · a much enlarged discussion of the meaning of “claim” and “dispute” and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submittal of claims by a contractor and by an employer; · the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and · five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards.

FIDIC Users' Guide Brian W. Totterdill, 2006 The FIDIC Conditions of Contract for Construction and the Conditions of Contract for Plant and Design-Build (known as the 1999 Red Book and the 1999 Yellow Book) were first published in 1999 and have been used for a large number of contracts around the world. During 2005, FIDIC and the multilateral development banks cooperated to publish the MDB Harmonised Conditions of Contract for Construction. This book is a revised and extended edition of the authors earlier guides.

Conditions of Contract for Design-build and Turnkey Fédération internationale des ingénieurs-conseils, 1995 The terms of the Conditions of Contract for Design - Build and Turnkey have been prepared by the Federation Internationale des Ingenieurs Conseils (FIDIC) and are recommended for general use for the purpose of the design and construction of works where tenders are invited on an international basis; with minor modifications, the Conditions are also suitable for use on domestic contracts.

FIDIC Silver Book Jakob B. Sørensen, 2019

Innovative Project Management with FIDIC Contracts Adriana Spassova, 2023-12-05 This book provides comprehensive guidance for the implementation of the legal requirements of FIDIC contracts with a detailed application of modern project management principles. It demonstrates that the FIDIC suites for works and services contain many tools for good project management, which can complement the innovation needed today to guide sustainable development. The author’s experience in construction management, construction law, and the application of FIDIC contracts as a FIDIC engineer, a procurement/claims consultant, and a FIDIC accredited/certified adjudicator and trainer underpins this unique and much-needed book linking FIDIC contract management with project management practices and concepts. It is structured around project management knowledge areas, and details not only the FIDIC works contracts (Red/Yellow/Silver 2017 Reprint 2022, Emerald 2019, Gold 2008, and Green Book 2021) but also the project management requirements of the contract between the Employer and Engineer (White Book 2017) and the FIDIC supply-chain contracts, and explains how these all interface in project governance. Linking the project management knowledge areas from the PMBOK® and its Construction Extension

with the FIDIC Body of Knowledge (FBOK), the book provides recommendations for integration of best practice and innovations. It illustrates these processes with 54 flowcharts and 16 case studies, as well as a railway scenario demonstrating the application of the book's recommended procedures. This will be an invaluable source of practical guidance for employers, contractors, and engineers responsible for procuring and managing construction projects. It provides useful insight for technical, legal, and financial experts on the management of processes, contracts, and digital tools, with recommendations on how to tailor and use the FIDIC contracts for project success.

Guide on Bid Evaluation Asian Development Bank,2010-10-01 This guide is intended to provide guidance to borrowers on bid evaluation procedures and how to prepare a bid evaluation report to be submitted to the Asian Development Bank, in connection with the procurement of contracts financed in whole or in part from proceeds of its loans.

Construction Law in the United Arab Emirates and the Gulf Michael Grose,2016-05-02 Construction Law in the United Arab Emirates and the Gulf is an authoritative guide to construction law in the United Arab Emirates and the Gulf. The principal theme is the contrast between construction law in an Islamic civil law jurisdiction and construction law in a common law jurisdiction. • the first authoritative text on the application of the laws of the UAE • extensive extracts from the region's applicable laws, all translated from Arabic, and hundreds of judgments of the most senior courts used to back up the analysis provided

A Contractor's Guide to the FIDIC Conditions of Contract Michael D. Robinson,2011-05-06

The FIDIC Red Book Contract Christopher Seppälä,2023-04-25 Conditions of Contract for Construction - known universally as the Red Book - published by the International Federation of Consulting Engineers (known by its French acronym FIDIC) is the most widely used standard form of international construction contract. This book is a detailed commentary on the 2022 reprint of the 2017 FIDIC Red Book. For each of the Red Book's 168 Sub-Clauses the commentary: identifies changes from the 1999 edition; analyses the meaning and significance of the Sub-Clause and lists related Sub-Clauses; describes related international arbitration awards, national court decisions and legal principles; and, where appropriate, proposes amendments to improve the Sub-Clause. As the FIDIC Yellow and Silver Books are very similar to the Red Book, much of the commentary is equally applicable to those forms of contract. The author is a FIDIC 'insider' having served for more than thirty years as Legal/Special Adviser to, or Member of, the FIDIC Contracts Committee which is responsible for preparing FIDIC's contracts. This book is an indispensable resource for all parties called on to work with a FIDIC contract. With guidance for every stage of a construction project, whether in drafting, negotiating, performing, interpreting, or administering a FIDIC contract, the book's easy-to-use structure includes such issues and topics as the following: introduction to FIDIC and its contracts and to publications of FIDIC and others relevant to the Red Book including

the 2022 FIDIC Contracts Guide; critical examination of each Sub-Clause and advice for amending the same in order to better adapt it to the interests of each party (the Employer or the Contractor); special attention to each Sub-Clause relating to the Contractor's and the Employer's claims and claims procedure and to how to assert claims effectively, as well as to time bars and other pitfalls and how they may be overcome; detailed examination of Sub-Clauses relating to the referral of issues or disputes to the Dispute Avoidance/Adjudication Board and, if necessary, to international arbitration, and optimal strategies for doing so; discussion of the changes required to the 2017 Red Book by The World Bank's Conditions of Particular Application ('COPA'); reference, where appropriate, to the UNIDROIT Principles of International Commercial Contracts and trade usages; comprehensive discussion of practical issues that arise under common law, civil law and international legal principles, especially when a contract is with a state or public body; comparison of common law and civil law methods of contract interpretation and a suggested practical approach to interpretation given a FIDIC contract's international arbitration clause; and overcoming problems that can arise when a contract is governed by the law of a less-developed country. Legal and technical terms are clearly defined, and numerous figures and tables are included to illustrate steps in contract procedures. Detailed attention is paid to terminological distinctions among the various legal traditions, including a comparison of British-English and American-English construction contract terms. Unquestionably the most detailed and thorough commentary ever published on the FIDIC Red Book, this highly practical work enables preparers of FIDIC contracts to amend and adapt the Red Book's provisions to a particular project. Dispute adjudicators, arbitrators, and judges will welcome the book's authoritative guidance on interpreting the provisions of a FIDIC contract, and engineers and other construction professionals involved in contract administration will appreciate the book's many practical features.

An Employer's and Engineer's Guide to the FIDIC Conditions of Contract Michael D. Robinson, 2013-04-22 When all parties involved in the construction process fully understand their roles and are able to anticipate potential points of conflict, disputes and delays will be minimised. The Employer's and Engineer's Guide to the FIDIC Conditions of Contract sets out the essential administrative requirements of a FIDIC based contract by reference to the FIDIC 1999 Red Book. The obligations and duties of the Employer and the Engineer are identified and discussed. Potential pitfalls are highlighted and likely consequences pointed out. The importance of the Employer's role in the preparation of tenders, which fully reflect his requirements and duties and obligations arising in the execution of the works, is emphasised. The key role of the Engineer in the effective administration of contracts after award is examined and commentary provided. Included in the guide are a number of appendices, including model letters which will be of value to less experienced staff (particularly those whose mother-tongue is not the English language). Engineers, quantity surveyors and project managers engaged in the contractual administration of international projects using FIDIC forms of contract will find the concise guidance in simple and jargon-free language provided here invaluable. This, together with the author's earlier book, Contractor's Guide to the FIDIC Conditions

of Contract - which describes the duties, rights and responsibilities of the Contractor - represents the totality of supervision, design and execution of construction projects executed under the FIDIC Conditions of Contract. This book's companion website offers invaluable resources to freely download, adapt and use: Model letters for use by the Employer Model letters for use by the Contractor Sample Interim Payment Certificate Model Form for Submissions to the Engineer Model Form of Engineer's Order for Varied Works Model Form of Daywork/Daily Record Sheets

The Aqua Group Guide to Procurement, Tendering and Contract Administration Mark Hackett, Gary Statham, 2017-05-02 This key text for the building team is an authoritative guide and gives a detailed account of the team's roles and responsibilities, with best industry practice required to ensure that building projects meet clients' expectations on time, cost and quality. The second edition of The Aqua Group Guide to Procurement, Tendering and Contract Administration has been edited, enlarged and updated by a high-profile author team with unparalleled experience of both private and public sectors, as well as of teaching on QS courses. It covers the entire building process from inception to final account and throughout, the emphasis is on current best practice. This edition has new material on the CDM regulations; JCT contracts; the RIBA Plan of Work; the RICS New Rules of Measurement; BIM; and Sustainability - as well as a general update for industry changes, especially on procurement; internationalisation; and PFI. With clear and thorough explanations, you are taken through self-contained chapters covering the detail of the briefing stage, procurement methods, tendering procedures, and contract administration. The period from starting a college course to successful completion of professional examinations represents a long and steep learning curve. The range of skills and the knowledge required to perform work efficiently and effectively might, at first, seem rather daunting. Although designed as an introductory textbook for undergraduates in construction, architecture and quantity surveying, The Aqua Group Guide offers an excellent overview of contract administration and will provide you with sufficient understanding to hold you in good stead for your early years in professional practice.

International Construction Contract Law Lukas Klee, 2018-07-05 The updated second edition of the practical guide to international construction contract law The revised second edition of International Construction Contract Law is a comprehensive book that offers an understanding of the legal and managerial aspects of large international construction projects. This practical resource presents an introduction to the global construction industry, reviews the basics of construction projects and examines the common risks inherent in construction projects. The author — an expert in international construction contracts — puts the focus on FIDIC standard forms and describes their use within various legal systems. This important text contains also a comparison of other common standard forms such as NEC, AIA and VOB, and explains how they are used in a global context. The revised edition of International Construction Contract Law offers additional vignettes on current subjects written by international panel of numerous contributors. Designed to be an accessible resource, the book includes a basic dictionary of construction contract terminology, many sample letters for Claim

Management and a wealth of examples and case studies that offer helpful aids for construction practitioners. The second edition of the text includes: • Updated material in terms of new FIDIC and NEC Forms published in 2017 • Many additional vignettes that clearly exemplify the concepts presented within the text • Information that is appropriate for a global market, rather than oriented to any particular legal system • The essential tools that were highlighted the first edition such as sample letters, dictionary and more • A practical approach to the principles of International Construction Contract Law and construction contract management. Does not get bogged down with detailed legal jargon Written for consulting engineers, lawyers, clients, developers, contractors and construction managers worldwide, the second edition of International Construction Contract Law offers an essential guide to the legal and managerial aspects of large international construction projects.

Sustainable Value Management for Construction Projects Ayodeji E. Oke, Clinton O. Aigbavboa, 2017-03-16 This book provides a unique guide to value management and sustainability in construction to researchers and professional. The book provides a better understanding of the concept of value management, the basis of sustainable construction and thereafter, demonstrates how using the principles of value management can help to achieve successful construction projects that are financially viable, socially beneficial and do not damage the environment. The book serves as an introduction to value management for scholars and researchers at all levels; and also as a practical guide for construction professionals, employers and other stakeholders in the construction industry.

Risk and Insurance in Construction Nael G. Bunni, 2003-09-02 Those involved in construction have to cope with so much learning in their own discipline that they shun further involvement in subjects such as insurance and law which in themselves are so deeply and intensely complex. However, insurance and law are interwoven in the basic procedures used in the construction industry for undertaking work, be they design, construction, supervision or operation, or any combination of them. This thoroughly revised edition of Nael Bunni's successful book, formerly called Insurance in Construction, provides information on risk, construction law and construction insurance for those involved with all aspects of construction. The chapters on risk have been expanded to include recent developments in the area and provide further examples of events which could occur on what can be viewed as the most risky human work activity, namely construction. New chapters are also added to deal with the insurance clauses of the many new standard forms of contract published in recent years, including FIDIC's new suite of contracts published in September 1999, ICE's seventh edition of the civil engineering standard form of contract, and ICE's second edition of the design/build form.

The 2017 FIDIC Contracts William Godwin, 2020-02-19 Provides a clear and comprehensive guide to the 2017 FIDIC contracts—written by a member of the FIDIC Updates Task Group FIDIC contracts are the most widely used engineering standard form contracts internationally but until 2017 the three main forms (the Red, Yellow and Silver Books) had not been

amended or updated for nearly two decades, since the first editions were published in 1999. Written by a specialist lawyer who was member of the FIDIC Updates Task Group responsible for writing the new contracts, this book examines in detail the many substantial changes they have introduced. After providing an overview the contracts are examined clause by clause with the aim of showing how each compares and contrasts with the others and how the second editions compare and contrast with the first. The first chapter describes how the Red, Yellow and Silver Books evolved from earlier contract forms and the distinctive characteristics of each, before providing an overview of the updates, including new potential risks for both Employer and Contractor, and then examining, in the second chapter, key general provisions such as the new rules on notices and limitation of liability. Chapter 3 examines the enhanced role of the Engineer in the Red and Yellow Books/Employer's Representative's function in the Silver including the new procedure for determinations as well as the Employer's obligations and contract administration. The Contractor's obligations are considered in chapter 4 while chapter 5 examines his responsibility for design in the Yellow and Silver Books. Chapters 6 to 14 deal respectively with plant, materials and workmanship and staff and labour; time-related provisions in the three contracts including extensions of time, and the Employer's right to suspend the works; testing on and after completion and the Employer's taking over of the works; defects after taking over, acceptance of the works and unfulfilled obligations; measurement (in the Red Book), the Contract Price and payment; the new variations regime and adjustments to the Price; termination and suspension; care of the works and indemnities and Exceptional Events (previously, Force Majeure). An important feature of the new contracts is their increased emphasis on clarity in the claims process and on dispute avoidance. These topics are examined in the final two chapters, 15 and 16, which deal respectively with the new claims and dispute resolution provisions of the 2017 forms. FIDIC contracts are the most widely used standard forms of contract for international engineering and construction projects Provides a clear and comprehensive guide to the 2017 FIDIC Red, Yellow and Silver Books Written by a senior specialist lawyer and member of the FIDIC 2017 Updates Task Group responsible for writing the new contracts Accessible to those with little or no familiarity with FIDIC contracts The 2017 FIDIC Contracts is an important guide for anyone engaged in international projects, including employers, contractors, engineers, lawyers, suppliers and project financiers/sponsors.
