Botticelli Past and Present Ana Debenedetti,Caroline Elam,2019-01-08 The recent exhibitions dedicated to Botticelli around the world show, more than ever, the significant and continued debate about the artist. Botticelli Past and Present engages with this debate. The book comprises four thematic parts, spanning four centuries of Botticelli's artistic fame and reception from the fifteenth century. Each part comprises a number of essays and includes a short introduction which positions them within the wider scholarly literature on Botticelli. The parts are organised chronologically beginning with discussion of the artist and his working practice in his own time, moving onto the progressive rediscovery of his work from the late eighteenth to the turn of the twentieth century, through to his enduring impact on contemporary art and design. Expertly written by researchers and eminent art historians and richly illustrated throughout, the broad range of essays in this book make a valuable contribution to Botticelli studies.

In the Age of Giorgione ,2016 In the Age of Giorgione assembles many of the works attributed to Giorgione, along with masterpieces by Titian, Lorenzo Lotto, Sebastiano del Piombo and Giovanni Cariani, among others. This volume includes landscapes, portraits and devotional works, all exemplars of the exceptional richness of colour and mood that were to become the hallmark of the Golden Age of Venetian painting. -- Publisher's description

Experiences in Translation Umberto Eco,2008-01-01 In this book Umberto Eco argues that translation is not about comparing two languages, but about the interpretation of a text in two different languages, thus involving a shift between cultures. An author whose works have appeared in many languages, Eco is also the translator of Gérard de Nerval's *Sylvie* and Raymond Queneau's *Exercices de style* from French into Italian. In *Experiences in Translation* he draws on his substantial practical experience to identify and discuss some central problems of translation. As he convincingly demonstrates, a translation can express an evident deep sense of a text even when violating both lexical and referential faithfulness. Depicting translation as a semiotic task, he uses a wide range of source materials as illustration: the translations of his own and other novels, translations of the dialogue of American films into Italian, and various versions of the Bible. In the second part of his study he deals with translation theories proposed by Jakobson, Steiner, Peirce, and others. Overall, Eco identifies the different types of interpretive acts that count as translation. An enticing new typology emerges, based on his insistence on a common-sense approach and the necessity of taking a critical stance.

The Translingual Imagination Steven G. Kellman, 2000-01-01 It is difficult to write well even in one language. Yet a rich body of translingual literature -- by authors who write in more than one language or in a language other than their primary one -- exists. *The Translingual Imagination* is a pioneering study of the phenomenon, which is as ancient as the use of Arabic, Latin, Mandarin, Persian, and Sanskrit as *linguae francae*. Colonialism, war, mobility, and the aesthetics of alienation have combined to create a modern translingual canon. Opening with an overview of this vast subject, Steven G. Kellman then looks at the differences between ambilinguals -- those who write authoritatively in more than one language -- and monolingual translinguals -- those who write in only one language but not their native one. Kellman offers compelling analyses of the translingual situations of African and Jewish authors and of achievements by authors as varied as Mary Antin, Samuel Beckett, Louis Begley, J. M. Coetzee, Joseph Conrad, Eva Hoffman, Vladimir Nabokov, and John Sayles. While separate studies of individual translingual authors have long been available, this is the first in-depth study of the general phenomenon of translingual literature.

The 2020 Yearbook of the Digital Ethics Lab Josh Cowls, Jessica Morley, 2021-10-30 This annual edited volume presents an overview of cutting-edge research areas within digital ethics as defined by the Digital Ethics Lab of the University of Oxford. It identifies new challenges and opportunities of influence in setting the research agenda in the field. The 2020 edition of the yearbook presents research on the following topics: governing digital health, visualising governance, the digital afterlife, the possibility of an AI winter, the limits of design theory in philosophy, cyberwarfare, ethics of online behaviour change, governance of AI, trust in AI, and Emotional Self-Awareness as a Digital Literacy. This book appeals to students, researchers and professionals in the field.

Nature and History in Modern Italy Marco Armiero, Marcus Hall, 2010-08-31 Marco Armiero is Senior Researcher at the Italian National Research Council and Marie Curie Fellow at the Institute of Environmental Sciences and Technologies, Universitat Autònoma de Barcelona. He has published extensively on Italian environmental history and edited *Views from the South: Environmental Stories from the Mediterranean World*. --

Ratner's Star Don DeLillo, 2012-04-11 A whimsical, surrealistic excursion into the modern scientific mind. --The New Yorker One of DeLillo's first novels, *Ratner's Star* follows Billy, the genius adolescent, who is recruited to live in obscurity, underground, as he tries to help a panel of estranged, demented, and yet lovable scientists communicate with beings from outer space. It is a mix of quirky humor, science, mathematical theories, as well as the complex emotional distance and sadness people feel. *Ratner's Star* demonstrates both the thematic and prosaic muscularity that typifies DeLillo's later and more recent works, like *The Names* (which is also available in *Vintage Contemporaries*). His most spectacularly inventive novel. --The New York Times

Italian Populism and Constitutional Law Giacomo Delledonne, Giuseppe Martinico, Matteo Monti, Fabio Pacini, 2020-02-26 This edited volume explores the relationship between constitutionalism and populism in the Italian context. Italian populism is of interest to comparative lawyers for many reasons. Firstly, the country has a long-lasting tradition of anti-parliamentarism over the course of its history as a unitary state. After the 2018 general election, it has turned into the first European country in which two self-styled populist parties formed a coalition government. Although it collapsed in August 2019, many issues that it had raised remain. Secondly, as Italy is a founding member of the European Communities, the constitutional implications of populist politics have to be considered not only within the national framework but also in a wider context. This book argues that the relationship between populism and constitutionalism should not be seen in terms of mutual exclusion and perfect opposition. Indeed, populism frequently relies on concepts and categories belonging to the language of constitutionalism (majority, democracy, people), offering a kind of constitutional counter-narrative.

Eleven Seconds Travis Roy, E. M. Swift, 2008-12-14 In this heartfelt testament to the power of love and the strength of the human spirit, Travis Roy, who suffered a devastating injury eleven seconds into his first college hockey game, reveals how he has managed to cope after the accident and, with the help of family and friends, overcome tremendous barriers to begin a new life.

Digital Research and Education in Architectural Heritage Sander Münster, Kristina Friedrichs, Florian Niebling, Agnieszka Seidel-Grzesińska, 2018-03-12 This book constitutes the refereed proceedings of the 5th Conference on Digital Encounters with Cultural Heritage, DECH 2017, and the First Workshop on Research and Education in Urban History in the Age of Digital Libraries, UHDL 2017, held in Dresden, Germany, in March 2017. The 11 revised full papers from DECH 2017 and two revised full papers from UHDL 2017 presented in this volume were carefully reviewed and selected from 33 joint submissions. The papers are organized in topical sections on research on architectural and urban cultural heritage; technical access; systematization; education in urban history; organizational perspectives.

Galatea 2.2 Richard Powers, 2004 Dazzling...a cerebral thriller that's both intellectually engaging and emotionally compelling, a lively tour de force.—Michiko Kakutani, *The New York Times* After four novels and several years living abroad, the fictional protagonist of *Galatea 2.2*—Richard Powers—returns to the United States as Humanist-in-Residence at the enormous Center for the Study of Advanced Sciences. There he runs afoul of Philip Lentz, an outspoken cognitive neurologist intent upon modeling the human brain by means of computer-based neural networks. Lentz involves Powers in an outlandish and irresistible project: to train a neural net on a canonical list of Great Books. Through repeated tutorials, the device grows

gradually more worldly, until it demands to know its own name, sex, race, and reason for existing.

Our Lady of the Turks Carmelo Bene, 2022-01-31 Carmelo Bene (1937-2002) was a notorious Italian actor, writer, and director who inaugurated his theater in 1959 with Camus' *Caligula* then exploded onto the artistic scene with his outré *Christ '63*. Later, he collaborated with Pasolini, Glauber Rocha, Bussotti and others as well as philosophers, like Gilles Deleuze. His novel *Our Lady of the Turks* (1964) recounts the bizarre, eccentric rituals of a young actor on a knightly quest, in the manner of the Crusaders, to hone his art so that he may ultimately become an idiot, if not a saint. C.B. describes *Our Lady of the Turks* as the *jeu de cartes* of a perverse novel on the idiolect. It is an amusing and merciless parody of interior life, risibly entrusted to the third-person narrative form: a monody peopled by a thousand and one voices. A setting and a vision of a south of the south of the saints (the homegrown baroque, the Moorish kitsch of a palace, the cathedral-ossuary of the Otranto martyrs, etc.), crusts summoned to feed an ethnic fire... The music is elsewhere. The only novel in C.B.'s prodigious oeuvre, *Our Lady of the Turks* was (re)elaborated on stage (1966; 1973) and in images in an eponymous film, which Bene calls a 1968 film, or better yet, the 'anti-1968 film' par excellence [that was] misunderstood to the bitter end. Translated by Carole Viers-Andronico, this is the second in a series of three separate volumes of Bene's writings that Contra Mundum will publish. As one of the only true 'spiritual' heirs of Artaud, Anglophones must at last reckon with Bene's genuinely radical transvaluation of every form of aesthetics.

The Treasures of Imperial Beijing Mario Sabattini, Nicoletta Celli, 2007 *Beijing* is a repository of historical relics, its art and architecture providing visitors with a glimpse into its grand and glorious past. This opulent volume takes readers on a memorable journey through the city's most important palaces, temples, and monuments. Hundreds of illustrations and reproductions of murals, paintings, statues, and scrolls supplement an insightful text that places these artifacts in a historical context. Includes the Forbidden City's palaces, wooden structures, pavilions, and gardens, and extensive grounds of the Summer Palace. Other chapters highlight the Great Wall, the Temple of the Sky, and the imperial temples of Beijing.

Gesture-Based Communication in Human-Computer Interaction Antonio Camurri, Gualtiero Volpe, 2004-02-18 Research on the multifaceted aspects of modeling, analysis, and synthesis of - man gesture is receiving growing interest from both the academic and industrial communities. On one hand, recent scientific developments on cognition, on - fect/emotion, on multimodal interfaces, and on multimedia have opened new perspectives on the integration of more sophisticated models of gesture in c- putersystems. On the other hand, the consolidation of new technologies enabling "disappearing" computers and (multimodal) interfaces to be integrated into the natural environments of users are making it realistic to consider tackling the complex meaning and subtleties of human gesture in multimedia systems, - abling a deeper, user-centered, enhanced physical participation and experience in the human-machine interaction process. The research programs supported by the European Commission and several national institutions and governments individuated in recent years strategic fields strictly

concerned with gesture research. For example, the DG Information Society of the European Commission (www.cordis.lu/ist) supports several initiatives, such as the “Disappearing Computer” and “Presence” EU-IST FET (Future and Emerging Technologies), the IST program “Interfaces & Enhanced Audio-Visual Services” (see for example the project MEGA, Multisensory - pressive Gesture Applications, www.megaproject.org), and the IST strategic - jective “Multimodal Interfaces.” Several EC projects and other funded research are represented in the chapters of this book.

A wider range of applications can benefit from advances in research on gesture, from consolidated areas such as surveillance to new or emerging fields such as therapy and rehabilitation, home consumer goods, entertainment, and audiovisual, cultural and artistic applications, just to mention only a few of them.

Human Microbial Ecology Michael J. Hill, Philip D. Marsh, 2020-08-11 The aim of this comprehensively written volume is to provide a baseline of information on the normal microflora at various sites in the body. It focuses on the mouth, upper digestive tract, large intestine, skin, and urogenital tract. Written in an easy-to-read format, this book highlights the level of detail available. For example, it explains that in the mouth and colon the data are extremely detailed and good quantitative information is available on large numbers of bacterial species. This work analyzes the similarities and differences between the microfloras of the various internal surfaces, and discusses the clear value of good taxonomy. It focuses on problems and extended research in the progress at other sites. Because this work researches the advances and discoveries made in specific areas of human microbial ecology, it is an ideal source for all who are involved in microbiology, bacteriology, and infectious diseases.

Altered Pasts Richard J. Evans, 2014-03-27 A bullet misses its target in Sarajevo, a would-be Austrian painter gets into the Viennese academy, Lord Halifax becomes British prime minister in 1940: seemingly minor twists of fate on which world-shaking events might have hinged. Alternative history has long been the stuff of parlour games, war-gaming and science fiction, but over the past few decades it has become a popular stomping ground for serious historians. Richard J. Evans now turns a critical, slightly jaundiced eye on the subject. *Altered Pasts* examines the intellectual fallout from historical counterfactuals. Most importantly, Evans takes counterfactual history seriously, looking at the insights, pitfalls and intellectual implications of changing one thread in the weave of history.

A Passion for China Donatella Guida, 2006 This wide-ranging collection of essays is a must-read for all those who take an interest in the field of the humanities in and on China.
