**Intermediate Accounting** Thomas H. Beechy, Joan Elizabeth Davison Conrod, Elizabeth Farrell, Ingrid McLeod-Dick, 2014  
*Counterparty Credit Risk, Collateral and Funding* Damiano Brigo, Massimo Morini, Andrea Pallavicini, 2013-03-05 The book's content is focused on rigorous and advanced quantitative methods for the pricing and hedging of counterparty credit and funding risk. The new general theory that is required for this methodology is developed from scratch, leading to a consistent and comprehensive framework for counterparty credit and funding risk, inclusive of collateral, netting rules, possible debit valuation adjustments, re-hypothecation and closeout rules. The book however also looks at quite practical problems, linking particular models to particular 'concrete' financial situations across asset classes, including interest rates, FX, commodities, equity, credit itself, and the emerging asset class of longevity. The authors also aim to help quantitative analysts, traders, and anyone else needing to frame and price counterparty credit and funding risk, to develop a 'feel' for

applying sophisticated mathematics and stochastic calculus to solve practical problems. The main models are illustrated from theoretical formulation to final implementation with calibration to market data, always keeping in mind the concrete questions being dealt with. The authors stress that each model is suited to different situations and products, pointing out that there does not exist a single model which is uniformly better than all the others, although the problems originated by counterparty credit and funding risk point in the direction of global valuation. Finally, proposals for restructuring counterparty credit risk, ranging from contingent credit default swaps to margin lending, are considered.

**Discounting and Intergenerational Equity** Paul R. Portney, John P. Weyant, 2013-10-18 The full effects of decisions made today about many environmental policies -including climate change and nuclear waste- will not be felt for many years. For issues with long-term ramifications, analysts often employ discount rates to compare present and future costs and benefits. This is reasonable, and discounting has become a procedure that raises few objections. But are the methods appropriate for measuring costs and benefits for decisions that will have impacts 20 to 30 years from now the right ones to employ for a future that lies 200 to 300 years in the future? This landmark book argues that methods reasonable for measuring gains and losses for a generation into the future may not be appropriate when applied to a longer span of time. Paul Portney and John Weyant have assembled some of the world's foremost economists to reconsider the purpose, ethical implications, and application of discounting in light of recent research and current policy concerns. These experts note reasons why conventional calculations involved in discounting are undermined when considering costs and benefits in the distant future, including uncertainty about the values and preferences of future generations, and uncertainties about available technologies. Rather than simply disassemble current methodologies, the contributors examine innovations that will make discounting a more compelling tool for policy choices that influence the distant future. They discuss the combination of a high short-term with a low long-term discount rate, explore discounting according to more than one set of anticipated preferences for the future, and outline alternatives involving simultaneous consideration of valuation, discounting and political acceptability.

Lessons from NAFTA Luis Serven, Daniel Lederman, William F. Maloney, 2004-11-15 Analyzing the experience of Mexico under the North American Free Trade Agreement (NAFTA), 'Lessons from NAFTA' aims to provide guidance to Latin American and Caribbean countries considering free trade agreements with the United States. The authors conclude that the treaty raised external trade and foreign investment inflows and had a modest effect on Mexico's average income per person. It is likely that the treaty also helped achieve a modest reduction in poverty and an improvement in job quality. This book will be of interest to scholars and policymakers interested in international trade and development.

**A Mandate to Grow** Eduardo A. Cavallo, Andrew Powell, 2018-03-15 The 2018 Macroeconomic Report, A Mandate to Grow, revisits the growth debate that has been raging in the region for the past half century. Viewing the debate from this long-term perspective allows for a focus on the structural factors that have prevented Latin America and the Caribbean from reaching the growth potential required to keep pace with faster growing regions and to fulfill the aspirations of its population.

Engineering Solutions for Sustainability Jeffrey W. Fergus, Brajendra Mishra, Dayan Anderson, Emily Allyn Sarver, Neale R. Neelameggham, 2015-08-06 This book contains a collection of papers presented at Engineering Solutions for Sustainability: Materials and Resources II, a special symposium organized as part of the TMS 2015 Annual Meeting & Exhibition and held in Orlando, Florida, March 15-19, 2015. With impending and burgeoning societal issues affecting both developed and emerging nations, the global engineering community has a responsibility and an opportunity to truly make a difference and contribute. The papers in this collection address what materials and resources are integral to meeting basic societal sustainability needs in critical areas of energy, transportation, housing, and recycling. Contributions focus on the engineering answers for cost-effective, sustainable pathways; the strategies for effective use of engineering solutions; and the role of the global engineering community. Authors share perspectives on the major engineering challenges that face our world today; identify, discuss, and prioritize engineering solution needs; and establish how these fit into developing global-demand pressures for materials and human resources.

Informality Guillermo Perry, 2007 Analyzes informality in Latin America, exploring root causes and reasons for and implications of its growth. This book uses two distinct but complementary lenses. communication intervention. The book also explores exposure to media and how it shapes our conceptions of health and illness. Using a life stages and environments approach, the book touches on the patient role and how we 'hear' information from health care providers as well as guidance on how to be a thoughtful consumer of health information.

**Fixing the Broken Promise of Education for All** Angela Hawke, 2015 *Fixing the Broken Promise of Education for All*, published by the UNESCO Institute for Statistics and UNICEF, presents the latest statistical evidence from administrative records and household surveys to better identify children who are out of school and the reasons for their exclusion from education. It aims to inform the policies needed to reach these children and finally deliver the promise of Education for All. Based on a series of national and regional studies and policy analysis by leading experts, the report explains why better data and cross-sector collaboration are fundamental to the design of effective interventions to overcome the barriers facing out-of-school children and adolescents. While highlighting the way forward for system-wide policies to improve educational quality and affordability, the report also presents the information needed for targeted approaches to address the compounding effects of disadvantage faced by children caught up in armed conflict, girls, working children, children with disabilities, or members of ethnic or linguistic minorities. This report presents a roadmap to improve the data, research and policies needed to catalyse action for out-of-school children as the world embarks on a new development agenda for education.

*Challenges and Opportunities for the Puerto Rico Economy* Craig Andrew Bond,Aaron Strong,Troy D. Smith,Megan Andrew,John S. Crown,Kathryn A. Edwards,Gabriella C. Gonzalez,Jill Luoto,Italo Gutierrez,Kyle Pratt,Lauren Kendrick,Karishma Patel,Alexander D. Rothenberg,Mark Stalczyński,Patricia K. Tong,Melanie A. Zaber,2020 Recovery of the Puerto Rico economy in the aftermath of Hurricanes Irma and Maria means not only rebuilding the public and private infrastructure, supply chains, human capital, and other contributors to economic output but also reversing negative economic trends that existed and presented major challenges to growth even before the storms hit. In their report, the authors explain the history of economic development and policy in Puerto Rico and discuss the state of the prestorm economy, including key economic challenges. They use the historical data on overall economic activity (unrelated to the hurricanes) to construct a counterfactual to assess the net causal effect of Hurricanes Irma and Maria on Puerto Rico's economy. The counterfactual examines what would have happened to employment, labor, population, and tourism, as well as the government of Puerto Rico's fiscal position, had the hurricanes not occurred. Observed economic indicators following the storms are then compared to this counterfactual to estimate the real net economic consequences of the hurricanes, including overall damage from the storms and the effect of the recovery effort. The analysis provides considerable detail on the conditions in Puerto Rico before and after the 2017 hurricane season so that decisionmakers can adopt better policies in rebuilding a sustainable and healthy economic sector and, more broadly, the whole of Puerto Rico. The authors recommend a set of principles based on economic theory and provide courses of action included in the recovery plan compiled from their findings about prestorm conditions and trends and the input/observations of on-the-ground partners and stakeholders in the recovery effort.
