**The Three Christs of Ypsilanti** Milton Rokeach,2011-04-19 On July 1, 1959, at Ypsilanti State Hospital in Michigan, the social psychologist Milton Rokeach brought together three paranoid schizophrenics: Clyde Benson, an elderly farmer and alcoholic; Joseph Cassel, a failed writer who was institutionalized after increasingly violent behavior toward his family; and Leon Gabor, a college dropout and veteran of World War II. The men had one thing in common: each believed himself to be Jesus Christ. Their extraordinary meeting and the two years they spent in one another's company serves as the basis for an investigation into the nature of human identity, belief, and delusion that is poignant, amusing, and at times disturbing. Displaying the sympathy and subtlety of a gifted novelist, Rokeach draws us into the lives of three troubled and profoundly different men who find themselves "confronted with the ultimate contradiction conceivable for human beings: more than one person claiming the same identity."

**Beneficial Microbes for Sustainable Agriculture and Environmental Management** Jeyabalan Sangeetha,Devarajan Thangadurai,Saher Islam,2020-03-27 Microbes are the most abundant organisms in the biosphere and regulate many critical elemental and biogeochemical phenomena. Because microbes are the key players in the carbon cycle and in related biological reactions, microbial ecology is a vital research area for understanding the contribution of the biosphere in global warming and the response of the natural environment to climate variations. The beneficial uses of microbes have enabled constructive and cost-effective responses that have not been possible through physical or chemical methods. This new volume reviews the multifaceted interactions among microbes, ecosystems, and their pivotal role in maintaining a more balanced environment, in order to help facilitate living organisms coexisting with the natural environment. With extensive references, tables, and illustrations, this book provides valuable information on microbial utilization for environmental sustainability and provides fascinating insights into microbial diversity. Key features include: Looks at enhancing plant production through growth-promoting arbuscular mycorrhizae, endophytic bacteria, and microbiome networks Considers microbial degradation and environmental management of e-wastes and azo dyes Explores soil-plant microbe interactions in metal-contaminated soils Examines radiation-resistant thermophiles for engineered bioremediation Describes potential indigenous/effective microbes for wastewater treatment processes Presents research on earthworms and microbes for

**Views from the Loft** Daniel Slager,2010-07-01 “Packed with inspirational, useful, and thought-provoking essays on the craft of writing from some of the best writers around.” —Minneapolis Star Tribune Teachers, exercises, mentors, critiques, humor, and inspiration: these form the fuel all writers need when they get down to work every day. For decades the Loft Literary Center has provided this fuel to an enormous community of writers. Views from the Loft brings together the collected wisdom of that community—its authors, students, and editors—giving anyone the tools and inspiration necessary to thrive in the writing life. A who’s who of writers on writing ranging from the National Book Award-winning poet Mark Doty to Newbery Medal-winning children’s author Kate DiCamillo, and touching on issues as delicate as the representation of family in memoir and as hilarious as a “sad-epiphany poem” mad lib for frustrated poets, this book is an essential collection of crucial tips and challenging questions for everyone who puts pen to page. The essays and interviews in this book include superstar writers like Rick Bass, Michael Cunningham, Grace Paley, Jim Moore, Kathleen Norris, Susan Power, Susan Straight, Bao Phi, Marilyn Hacker, Shannon Olson, R.D. Zimmerman, Lorna Landvik, Vivian Gornick, Yehuda Amichai, and many more.
