

Experiencing Cities 2nd Revised Edition

United States. Federal Housing Administration

Experiencing Cities Mark Hutter,2015-12-22 This extraordinary text for undergraduate urban students is a reflection of Mark Hutter's academic interests in urban sociology and his life-long passion for experiencing city life. His deep academic roots in the Chicago School of Sociology help inform and appreciate the variety of urban structures and processes and their effect on the everyday lives of people living in cities. This text, however, extends the Chicago School perspective by combining its traditions with a social psychological perspective derived from symbolic interaction and also with a macro-level examination of social organization, social change, stratification and power in the urban context, informed by political economy. This entirely new, 3rd Edition has a global outlook on city life, and a visual presentation unmatched among books in this genre.

Introduction to Cities Xiangming Chen,Anthony M. Orum,Krista E. Paulsen,2018-04-30 The revised and updated second edition of *Introduction to Cities* explores why cities are such a vital part of the human experience and how they shape our everyday lives. Written in engaging and accessible terms, *Introduction to Cities* examines the study of cities through two central concepts: that cities are places, where people live, form communities, and establish their own identities, and that they are spaces, such as the inner city and the suburb, that offer a way to configure and shape the material world and natural environment. *Introduction to Cities* covers the theory of cities from an historical perspective right through to the most recent theoretical developments. The authors offer a balanced account of life in cities and explore both positive and negative themes. In addition, the text takes a global approach, with examples ranging from Berlin and Chicago to Shanghai and Mumbai. The book is extensively illustrated with updated maps, charts, tables, and photographs. This new edition also includes a new section on urban planning as well as new chapters on cities as contested spaces, exploring power and politics in an urban context. It contains; information on the status of poor and marginalized groups and the impact of neoliberal policies; material on gender and sexuality; and presents a greater range of geographies with more attention to European, Latin American, and African cities. Revised and updated, *Introduction to Cities* provides a complete introduction to the history, evolution, and future of our modern cities.

Experiencing Cities Mark Hutter,2020-10-21 The fourth edition of Mark Hutter's *Experiencing Cities* examines cities and larger metropolitan areas within a truly global framework, lending readers much to understand and appreciate about the

variety of urban structures and processes and their effect on the everyday lives of people residing in cities. Beginning with the emergence of the first urban centers and continuing to examine the present day and the future of smart cities, this book explores the changing cultural and domestic character of the metropolis and offers readers a complete historical and theoretical overview of municipal life. The new edition seamlessly integrates issues of gender, race, ethnicity, sexuality, and class in its examination of city and suburban life, and further extends the Chicago School of Sociology perspective by combining its traditions with a distinct social psychological orientation derived from symbolic interaction and macro-level examination of social organization, social change, and power in the urban context. With this strong and sweeping interdisciplinary approach, the new edition of *Experiencing Cities* will continue to enrich students' understandings of urban life and offer new, forward-looking perspective to those working in the fields of urban sociology, history, politics, geography, and the arts.

Introduction to Cities Xiangming Chen, Anthony M. Orum, Krista E. Paulsen, 2012-06-25 A complete introduction to the history, evolution, and future of the modern city, this book covers a wide range of theory, including the significance of space and place, to provide a balanced account of why cities are an essential part of the global human experience. Covers a wide range of theoretical approaches to the city, from the historical to the cutting edge Emphasizes the important themes of space and place Offers a balanced account of cities and offers extensive coverage including urban inequality, environment and sustainability, and methods for studying the city Takes a global approach, with examples from Berlin and Chicago to Shanghai and Mumbai Includes a range of pedagogical features such as a substantial glossary of key terms, critical thinking questions, suggestions for further reading and a range of innovative textboxes which follow the themes of *Exploring Further*, *Studying the City* and *Making the City Better* Extensively illustrated with maps, charts, tables, and over 80 photographs Accompanied by a comprehensive student companion site featuring a list of relevant journals, a guide to useful web resources, and an annotated documentary film guide, alongside a useful instructor companion site with further examples, case studies, and discussion and essay questions; instructors will find a link to the instructor website on the student website at www.wiley.com/go/cities

Cities and Natural Process Michael Hough, 2004 This key book is a revised and updated discussion of the fundamental conflict in the perception of nature, and an expression of the essential need for an environmental view when approaching urban design. Whilst retaining the existing structure, each of the chapters has been revised to take into account recent theoretical and practical developments. A completely new concluding chapter has been added which draws together the themes of the volume and links these to broader landscape issues such as greenway systems, landscape ecology and green infrastructure.

The Experience of Place Tony Hiss, 1991-10-01 Why do some places—the concourse of Grand Central Terminal or a

small farm or even the corner of a skyscraper—affect us so mysteriously and yet so forcefully? What tiny changes in our everyday environments can radically alter the quality of our daily lives? The Experience of Place offers an innovative and delightfully readable proposal for new ways of planning, building, and managing our most immediate and overlooked surroundings.

Two Cities Cynthia Zarin, 2020-08-11 From acclaimed poet and New Yorker writer Cynthia Zarin comes a deeply personal meditation on two cities, Venice and Rome—each a work of art, both a monument to the past—and on how love and loss shape places and spaces. Here we encounter a writer deeply engaged with narrative in situ—a traveler moving through beloved streets, sometimes accompanied, sometimes solo. With her, we see, anew, the Venice Biennale, the Lagoon, and San Michele, the island of the dead; the Piazza di Spagna, the Tiber, the view from the Gianicolo; the pigeons at San Marco and the parrots in the Doria Pamphili. As a poet first and foremost, Zarin’s attention to the smallest details, the loveliest gesture, brings Venice and Rome vividly to life for the reader. The sixteenth book in the expanding, renowned ekphrasis series, *Two Cities* creates space for these two historic cities to become characters themselves, their relationship to the writer as real as any love affair.

The Globalizing Cities Reader Xuefei Ren, Roger Keil, 2017-10-12 The newly revised *Globalizing Cities Reader* reflects how the geographies of theory have recently shifted away from the western vantage points from which much of the classic work in this field was developed. The expanded volume continues to make available many of the original and foundational works that underpin the research field, while expanding coverage to familiarize students with new theoretical and epistemological positions as well as emerging research foci and horizons. It contains 38 new chapters, including key writings on globalizing cities from leading thinkers such as John Friedmann, Michael Peter Smith, Saskia Sassen, Peter Taylor, Manuel Castells, Anthony King, Jennifer Robinson, Ananya Roy, and Fulong Wu. The new Reader reflects the fact that world and global city studies have evolved in exciting and wide-ranging ways, and the very notion of a distinct global class of cities has recently been called into question. The sections examine the foundations of the field and processes of urban restructuring and global city formation. A large number of new entries focus on the emerging urban worlds of Asia, Latin America and Africa, including Beijing, Bogota, Cairo, Cape Town, Delhi, Istanbul, Medellin, Mumbai, Phnom Penh, Rio de Janeiro, Sao Paulo, and Shanghai. The book also presents cases off the conventional map of global cities research, such as smaller cities and less known urban regions that are undergoing processes of globalization. The book is a key resource for students and scholars alike who seek an accessible compendium of the intellectual foundations of global urban studies as well as an overview of the emergent patterns of early 21st century urbanization and associated sociopolitical contestation around the world.

Strategies for Landscape Representation Paul Cureton, 2016-12-08 *Strategies for Landscape Representation*

discusses a variety of digital and analogue production techniques for the representation of landscape at multiple scales. Careful consideration is required to represent time, and to ensure accuracy of representation and evaluation in the landscape. Written as a guide for making appropriate selection of a wide variety of visualisation tools for students and built environment professionals with an interest in landscape, the book charts emerging technologies and historical contexts whilst also being relevant to landscape legislation such as Building Information Modelling (BIM) and Landscape Assessment. This book is an innovation-driven text that encourages readers to make connections between software, technology and analogue modes. The management, choice and combination of such modes can arguably narrow the unknown of landscape character, address the issues of representing time and change in landscape and engage and represent communities' perceptions and experience of landscape. Showcasing international examples from landscape architecture, planning, urban design and architecture, artists, visualisers, geographers, scientists and model makers, the vitality of making and intrinsic value of representational work in these processes and sites is evidenced. An accompanying companion website provides access to original source files and tutorials totalling over a hundred hours in mapping and GIS, diagrams and notation, photomontage, 3D modelling and 3D printing.

Trains, Buses, People, Second Edition Christof Spieler, 2021-08-24 Fully updated and expanded--Back cover.

Cities and Development Sean Fox, Tom Goodfellow, 2016-02-11 For the first time in human history more people now live in towns and cities than in rural areas. In the wealthier countries of the world, the transition from predominantly rural to urban habitation is more or less complete. But in many parts of Africa, Asia and Latin America, urban populations are expanding rapidly. Current UN projections indicate that virtually all population growth in the world over the next 30 years will be absorbed by towns and cities in developing countries. These simple demographic facts have profound implications for those concerned with understanding and addressing the pressing global development challenges of reducing poverty, promoting economic growth, improving human security and confronting environmental change. This revised and expanded second edition of *Cities and Development* explores the dynamic relationship between urbanism and development from a global perspective. The book surveys a wide range of topics, including: the historical origins of world urbanization; the role cities play in the process of economic development; the nature of urban poverty and the challenge of promoting sustainable livelihoods; the complexities of managing urban land, housing, infrastructure and urban services; and the spectres of endemic crime, conflict and violence in urban areas. This updated volume also contains two entirely new chapters: one that examines the links between urbanisation and environmental change, and a second that focuses on urban governance and politics. Adopting a multidisciplinary perspective, the book critically engages with debates in urban studies, geography and international development studies. Each chapter includes supplements in the form of case studies, chapter summaries, questions for discussion and suggested further readings. The book is targeted at upper-level undergraduate and graduate

students interested in geography, urban studies and international development studies, as well as policy makers, urban planners and development practitioners.

Curbing Traffic Chris Bruntlett, Melissa Bruntlett, 2021-06-29 In *Curbing Traffic: The Human Case for Fewer Cars in Our Lives*, mobility experts Melissa and Chris Bruntlett chronicle their experience living in the Netherlands and the benefits that result from treating cars as visitors rather than owners of the road. They weave their personal story with research and interviews with experts and Delft locals to help readers share the experience of living in a city designed for people. Their insights will help decision makers and advocates to better understand and communicate the human impacts of low-car cities: lower anxiety and stress, increased independence, social autonomy, inclusion, and improved mental and physical wellbeing. *Curbing Traffic* provides relatable, emotional, and personal reasons why it matters and inspiration for exporting the low-car city.

Survey of Apartment Dwelling Operating Experience in Large American Cities United States. Federal Housing Administration, 1940

The Irish-American Experience in New Jersey and Metropolitan New York Marta Deyrup, Maura Grace Harrington, 2013-11-29 This book is a collection of nine essays exploring the Irish-American experience in the New Jersey and New York metropolitan area, both historically and today. The essays place the local Irish-American experience in the wider context of immigration studies, assimilation, and historical theory. Using case studies, interviews, scholarly research in primary historical documents and theory, and first-hand experience, the authors delve into what it has meant, and means, to be Irish American in the New Jersey and New York area, projecting what this ethnic identity will signify in years to come. Representing a variety of scholarly and professional disciplines, from archivists; to historians; to lawyers; to scholars of literature and theology; the authors share their own unique perspectives on the significance of the contributions of Irish-Americans to American life in various arenas. Each chapter is interdisciplinary, revealing the interconnections among cultural history, biography, contemporary events, and literary appreciation. It is through these intersections of disciplines, of past and present, of individual and community, that we can best analyze and appreciate the ways that Irish-Americans have shaped life in the New Jersey/New York area over the past two centuries.

Smart Cities: Big Data, Civic Hackers, and the Quest for a New Utopia Anthony M. Townsend, 2013-10-07 An unflinching look at the aspiring city-builders of our smart, mobile, connected future. From Beijing to Boston, cities are deploying smart technology—sensors embedded in streets and subways, Wi-Fi broadcast airports and green spaces—to address the basic challenges faced by massive, interconnected metropolitan centers. In *Smart Cities*, Anthony M. Townsend

documents this emerging futuristic landscape while considering the motivations, aspirations, and shortcomings of the key actors—entrepreneurs, mayors, philanthropists, and software developers—at work in shaping the new urban frontier.

Slow Cities Paul Tranter, Rodney Tolley, 2020-06-18 *Slow Cities: Conquering Our Speed Addiction for Health and Sustainability* demonstrates, counterintuitively, that reducing the speed of travel within cities saves time for residents and creates more sustainable, liveable, prosperous and healthy environments. This book examines the ways individuals and societies became dependent on transport modes that required investment in speed. Using research from multiple disciplinary perspectives, the book demonstrates ways in which human, economic and environmental health are improved with a slowing of city transport. It identifies effective methods, strategies and policies for decreasing the speed of motorised traffic and encouraging a modal shift to walking, cycling and public transport. This book also offers a holistic assessment of the impact of speed on daily behaviours and life choices, and shows how a move to slow down will - perhaps surprisingly - increase accessibility to the city services and activities that support healthy, sustainable lives and cities. - Includes cases from cities in North and South America, Europe, Asia, Africa and Australasia - Uses evidence-based research to support arguments about the benefits of slowing city transport - Adopts a broad view of health, including the health of individuals, neighbourhoods and communities as well as economic health and environmental health - Includes text boxes, diagrams and photos illustrating the slowing of transport in cities throughout the world, and a list of references including both academic sources and valuable websites

Cities as Sustainable Ecosystems Peter Newman, Isabella Jennings, 2012-09-26 Modern city dwellers are largely detached from the environmental effects of their daily lives. The sources of the water they drink, the food they eat, and the energy they consume are all but invisible, often coming from other continents, and their waste ends up in places beyond their city boundaries. *Cities as Sustainable Ecosystems* shows how cities and their residents can begin to reintegrate into their bioregional environment, and how cities themselves can be planned with nature's organizing principles in mind. Taking cues from living systems for sustainability strategies, Newman and Jennings reassess urban design by exploring flows of energy, materials, and information, along with the interactions between human and non-human parts of the system. Drawing on examples from all corners of the world, the authors explore natural patterns and processes that cities can emulate in order to move toward sustainability. Some cities have adopted simple strategies such as harvesting rainwater, greening roofs, and producing renewable energy. Others have created biodiversity parks for endangered species, community gardens that support a connection to their foodshed, and pedestrian-friendly spaces that encourage walking and cycling. A powerful model for urban redevelopment, *Cities as Sustainable Ecosystems* describes aspects of urban ecosystems from the visioning process to achieving economic security to fostering a sense of place.

Cities of Tomorrow Peter Hall, 1997-02-18 *Cities of Tomorrow* is a critical history of planning in theory and practice in

the twentieth century, as well as of the social and economic problems and opportunities that gave rise to it. Trenchant, perceptive, global in coverage, this book is an unrivalled account of its crucial subject. The third edition of *Cities of Tomorrow* is comprehensively revised to take account of abundant new literature published since its original appearance, and to view the 1990s in historical perspective. This is the definitive edition, reviewing the development of the modern planning movement over the entire span of the twentieth century.

Reader's Guide to the Social Sciences Jonathan Michie, 2014-02-03 This 2-volume work includes approximately 1,200 entries in A-Z order, critically reviewing the literature on specific topics from abortion to world systems theory. In addition, nine major entries cover each of the major disciplines (political economy; management and business; human geography; politics; sociology; law; psychology; organizational behavior) and the history and development of the social sciences in a broader sense.
