World Civilizations Peter N. Stearns, Michael Adas, Stuart B. Schwartz, Marc Jason Gilbert, 2010 Designed for introductory-level survey courses in World History. The primary goal of World Civilizations is to present a truly global history-from the development of agriculture and herding to the present. Using a unique periodization, this book divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while at the same time assessing the development of major societies. Encompassing social and cultural as well as political and economic history, the book examines key civilizations in world history. World Civilizations balances this discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact.

World Civilizations Peter N. Stearns,Michael Adas,Stuart B. Schwartz,2001 The primary goal of World Civilizations is to present a TRULY GLOBAL HISTORY one that both discusses the development of the world's leading civilizations and also emphasizes the major stages in the interactions among different peoples and societies. World Civilizations examines all the world's civilizations, including those in the Western tradition but also those civilizations sometimes neglected in world history texts for example, the nomadic societies of Asia, Latin America, and the nations and states of the Pacific Rim. World Civilizations balances this discussion of independent developments in all the world's major civilizations with comparative analysis of the results of international contact. World Civilizations organizes its presentation of global history into SIX COHERENT TIME PERIODS, with each period defined by the new and parallel patterns that evolved among all or most civilizations during the particular era. The six periods correspond to the six parts of the book. Within each part, the authors identify specific themes that characterize common experiences or common forces in individual societies as well as the new kinds and patterns of global contacts that emerged during the era. Thus, for example, Part I of the book discusses the developmental stage of world history, including the rise of agriculture and the development of civilization. Part II examines the classical era in global history, an era marked by the integration of large regions and diverse groups of people through overarching cultural and political systems. Subsequent parts of the book continue the emphasis on geographic shifts and the intensification of contact among civilizations.

Tom Grunfeld,Gerald Markowitz,David Rosner,2001 The second in a two-volume anthology of primary, secondary and visual sources, this reader provides a broad introduction to the evolution of World Civilizations from ancient history to 1700, and gives students insight into how historians use and interpret evidence in an effort to broaden their understanding of civilizations around the world. A wide selection of documents, images, maps and charts is presented along with chapter-opening timelines, source introductions, points for consideration, and questions designed to clarify the material and stimulate discussion. The reader is organized chronologically, but also provides an alternate topical Table of Contents, which allows instructors and students to compare sources across cultures and time periods. A new feature to this edition, Using This Book, assists students in fully analyzing sources and context.
