U.S. Marines In Vietnam: Fighting The North Vietnamese, 1967 Maj. Gary L. Telfer, Lt.-Col. Lane Rogers, Dr. V. Keith Fleming Jr., 2016-08-09 This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam's northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF's perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy's Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

Emergencies in Urology M. Hohenfellner, R.A. Santucci, 2007-08-18 This is a comprehensive textbook covering one of the few remaining blind spots on the map of urological literature. To date only a small number of publications have been dedicated to the topic of urgent and emergent problems in urology, important though they are in everyday clinical medicine. The editors are both internationally recognized urological experts and have made the effort to present an in-depth study into virtually every possible urgent urological situation with which a urologist may be confronted today. Thus the book includes chapters on topics such as urological trauma, urosepsis, urinary obstruction, oncological emergencies, intra- and postoperative complications, acute problems in children, and many more.

Mammals of South America, Volume 2 James L. Patton, Ulyses F. J. Pardiñas, Guillermo D'Elía, 2015-03-09 The second

installment in a planned three-volume series, this book provides the first substantive review of South American rodents published in over fifty years. Increases in the reach of field research and the variety of field survey methods, the introduction of bioinformatics, and the explosion of molecular-based genetic methodologies have all contributed to the revision of many phylogenetic relationships and to a doubling of the recognized diversity of South American rodents. The largest and most diverse mammalian order on Earth—and an increasingly threatened one—Rodentia is also of great ecological importance, and *Rodents* is both a timely and exhaustive reference on these ubiquitous creatures. From spiny mice and guinea pigs to the oversized capybara, this book covers all native rodents of South America, the continental islands of Trinidad and Tobago, and the Caribbean Netherlands off the Venezuelan coast. It includes identification keys and descriptions of all genera and species; comments on distribution; maps of localities; discussions of subspecies; and summaries of natural, taxonomic, and nomenclatural history. *Rodents* also contains a detailed list of cited literature and a separate gazetteer based on confirmed identifications from museum vouchers and the published literature.

The Macho Paradox Jackson Katz, 2019-06-04 A fully revised and updated edition to a classic bestseller, *The Macho Paradox* is the first book to show how violence against women is a men's issue—and how all genders can come together to stop it. From the #MeToo movement to current discussions about gender norms in schools, sports, politics, and media culture, *The Macho Paradox* incorporates the voices and experiences of the women, men, and others who have confronted the problem of gender violence from all angles. Bestselling author Jackson Katz is a pioneering educator and activist on the topic of men's violence against women. In this revised edition of his heralded book, Katz outlines the ways in which cultural ideas about manhood contribute to men's sexually harassing and abusive behaviors and that men have a positive role to play in challenging and changing the sexist cultural norms that too often lead to gender violence. This important book for abused women covers topics ranging from mental and emotional abuse to sexual harassment to domestic violence and is a vital read for women with controlling partners or as a self-help book for men. Praise for *The Macho Paradox*: A candid look at the cultural factors that lend themselves to tolerance of abuse and violence against women.—Booklist If only men would read Katz's book, it could serve as a potent form of male consciousness-raising.—Publishers Weekly These pages will empower both men and women to end the scourge of male violence and abuse. Katz knows how to cut to the core of the issues, demonstrating undeniably that stopping the degradation of women should be every man's priority.—Lundy Bancroft, author of *Why Does He Do That?: Inside the Minds of Angry and Controlling Men*

Poor Economics Abhijit V. Banerjee, Esther Duflo, 2012-03-27 The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions

based on years of field research from around the world. Called marvelous, rewarding by the Wall Street Journal, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. Poor Economics shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

U.S. Marines In Vietnam: The Landing And The Buildup, 1965 Dr. Jack Shulimson, Maj. Charles M. Johnson, 2016-08-09 This is the second volume in a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details the Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000-man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northernmost corps area, I Corps, and their mission expanded from defense of the Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed forces but in less detail than its predecessor volume, U.S. Marines in Vietnam, 1954-1964; The Advisory and Combat Assistance Era.

Cooking Data Cal (Crystal) Biruk, 2018-03-15 In Cooking Data Crystal Biruk offers an ethnographic account of research into the demographics of HIV and AIDS in Malawi to rethink the production of quantitative health data. While research practices are often understood within a clean/dirty binary, Biruk shows that data are never clean; rather, they are always "cooked" during their production and inevitably entangled with the lives of those who produce them. Examining how the relationships among fieldworkers, supervisors, respondents, and foreign demographers shape data, Biruk examines the ways in which units of information—such as survey questions and numbers written onto questionnaires by fieldworkers—acquire value as statistics that go on to shape national AIDS policy. Her approach illustrates how on-the-ground dynamics and research cultures mediate the production of global health statistics in ways that impact local economies and formulations of power and expertise.

Post-Colonial and African American Women's Writing Gina Wisker, 2017-03-04 This accessible and unusually wide-ranging book is essential reading for anyone interested in postcolonial and African American women's writing. It provides a valuable gender and culture inflected critical introduction to well established women writers: Toni Morrison, Alice Walker, Margaret Atwood, Suniti Namjoshi, Bessie Head, and others from the U.S.A., India, Africa, Britain, Australia, New Zealand and introduces emergent writers from South East Asia, Cyprus and Oceania. Engaging with and clarifying contested critical areas of feminism and the postcolonial; exploring historical background and cultural context, economic, political, and psychoanalytic influences on gendered experience, it provides a cohesive discussion of key issues such as cultural and gendered identity, motherhood, mothertongue, language, relationships, women's economic constraints and sexual politics.

Gilded Age Ivan Franceschini, Nicholas Loubere, 2018-04-01 According to the Chinese zodiac, 2017 was the year of the 'fire rooster', an animal often associated with the mythical fenghuang, a magnificently beautiful bird whose appearance is believed to mark the beginning of a new era of peaceful flourishing. Considering the auspicious symbolism surrounding the fenghuang, it is fitting that on 18 October 2017, President Xi Jinping took to the stage of the Nineteenth Party Congress to proclaim the beginning of a 'new era' for Chinese socialism. However, in spite of such ecumenical proclamations, it became immediately evident that not all in China would be welcome to reap the rewards promised by the authorities. Migrant workers, for one, remain disposable. Lawyers, activists and even ordinary citizens who dare to express critical views also hardly find a place in Xi's brave new world. This Yearbook traces the stark new 'gilded age' inaugurated by the Chinese Communist Party. It does so through a collection of more than 40 original essays on labour, civil society and human rights in China and beyond, penned by leading scholars and practitioners from around the world.

Handbook of Diversity Issues in Health Psychology Pamela M. Kato, Traci Mann, 2007-07-27 The field of health psychology has grown dramatically in the last decade, with exciting new developments in the study of how psychological and psychosocial processes contribute to risk for and disease sequelae for a variety of medical problems. In addition, the quality and effectiveness of many of our treatments, and health promotion and disease prevention efforts, have been significantly enhanced by the contributions of health psychologists (Taylor, 1995). Unfortunately, however, much of the theorizing in health psychology and the empirical research that derives from it continue to reflect the mainstream bias of psychology and medicine, both of which have a primary focus on white, heterosexual, middle-class American men. This bias pervades our thinking despite the demographic heterogeneity of American society (U. S. Bureau of the Census, 1992) and the substantial

body of epidemiologic evidence that indicates significant group differences in health status, burden of morbidity and mortality, life expectancy, quality of life, and the risk and protective factors that contribute to these differences in health outcomes (National Center for Health Statistics, 1994; Myers, Kagawa-Singer, Kumanyika, Lex, & M- kides, 1995). There is also substantial evidence that many of the health promotion and disease prevention efforts that have proven effective with more affluent, educated whites, on whom they were developed, may not yield comparable results when used with populations that differ by ethnicity, social class, gender, or sexual orientation (Cochran & Mays, 1991; Castro, Coe, Gutierrez, & Saenz, this volume; Chesney & Nealey, this volume).

Canaanite Myth and Hebrew Epic Frank Moore CROSS, Frank Moore Cross, 2009-06-30 Annotation The essays contained in this book are preliminary studies directed toward a new synthesis of the history of the religion of Israel. Each study is addressed to a special and, in the authors view, unsolved problem in the description of Israel's religious development.

Gaga Feminism J. Jack Halberstam, 2012-09-18 Using Lady Gaga as a symbol for a new kind of feminism, this “provocative and pleasurable romp through contemporary gender politics . . . is as fun as it is illuminating” (Ariel Levy, *New Yorker*) Why are so many women single, so many men resisting marriage, and so many gays and lesbians having babies? Gaga Feminism answers these questions while attempting to make sense of the tectonic cultural shifts that have transformed gender and sexual politics in the last few decades. This colorful landscape is populated by symbols and phenomena as varied as pregnant men, late-life lesbians, SpongeBob SquarePants, and queer families. So how do we understand the dissonance between these real experiences and the heteronormative narratives that dominate popular media? We can embrace the chaos! With equal parts edge and wit, J. Jack Halberstam reveals how these symbolic ruptures open a critical space to embrace new ways of conceptualizing sex, love, and marriage. Using Lady Gaga as a symbol for a new era, Halberstam deftly unpacks what the pop superstar symbolizes, to whom and why. The result is a provocative manifesto of creative mayhem—a roadmap to sex and gender for the twenty-first century—that holds Lady Gaga as an exemplar of a new kind of feminism that privileges gender and sexual fluidity. Part handbook, part guidebook, and part sex manual, *Gaga Feminism* is the first book to take seriously the collapse of heterosexuality and find signposts in the wreckage to a new and different way of doing sex and gender.
