Democracy and Education John Dewey, 1916 . *Renewal of Life by Transmission*. The most notable distinction between living and inanimate things is that the former maintain themselves by renewal. A stone when struck resists. If its resistance is greater than the force of the blow struck, it remains outwardly unchanged. Otherwise, it is shattered into smaller bits. Never does the stone attempt to react in such a way that it may maintain itself against the blow, much less so as to render the blow a contributing factor to its own continued action. While the living thing may easily be crushed by superior force, it none the less tries to turn the energies which act upon it into means of its own further existence. If it cannot do so, it does not just split into smaller pieces (at least in the higher forms of life), but loses its identity as a living thing. As long as it endures, it struggles to use surrounding energies in its own behalf. It uses light, air, moisture, and the material of soil. To say that it uses them is to say that it turns them into means of its own conservation. As long as it is growing, the energy it expends in thus turning the environment to account is more than compensated for by the return it gets: it grows. Understanding the word control in this sense, it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up. Life is a self-renewing process through action upon the environment.

Concepts for Nursing Practice Jean Giddens, 2017 This innovative interactive text explains 58 of the most common nursing concepts - including six all new concepts - that span the areas of patient physiology, patient behavior, and the professional nursing environment. Featured exemplars for each concept are also discussed to help you more easily understand the concepts and apply them to the clinical setting. In addition to more concepts and featured exemplar sections, this new second edition also boasts a more intuitive organization and review questions for both RN and LPN/LVN programs-- Publisher.

Forever Today Deborah Wearing, 2011-07-31 Clive Wearing has one of the most extreme cases of amnesia ever known. In 1985, a virus completely destroyed a part of his brain essential for memory, leaving him trapped in a limbo of the constant present. Every conscious moment is for him as if he has just come round from a long coma, an endlessly repeating loop of awakening. A brilliant conductor and BBC music producer, Clive was at the height of his success when the illness struck. As damaged as Clive was, the musical part of his brain seemed unaffected, as was his passionate love for Deborah, his wife. For seven years he was kept in the London hospital where the ambulance first dropped him off, because there was nowhere else

for him to go. Deborah desperately searched for treatments and campaigned for better care. After Clive was finally established in a new special hospital, she fled to America to start her life over again. But she found she could never love another the way she loved Clive. Then Clive's memory unaccountably began to improve, ten years after the illness first struck. She returned to England. Today, although Clive still lives in care, and still has the worst case of amnesia in the world, he continues to improve. They renewed their marriage vows in 2002. This is the story of a life lived outside time, a story that questions and redefines the essence of what it means to be human. It is also the story of a marriage, of a bond that runs deeper than conscious thought.

The Craft of Research, 2nd edition Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2008-04-15 Since 1995, more than 150,000 students and researchers have turned to *The Craft of Research* for clear and helpful guidance on how to conduct research and report it effectively . Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, *The Craft of Research* explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, So what? Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made *The Craft of Research* an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to

this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources
New information on the visual representation of data
Expanded bibliography with many electronic sources

The Wild Boy of Aveyron Jean Marc Gaspard Itard, 1962 A full account of Dr. Jean-Marc Itard's work, in the early 1800s, with Victor, who had lived wild for twelve years, and of the resulting educational, psychological, anthropological, and philosophical controversies and changes.

Points of View in the Modern History of Psychology Claude E. Buxton, 2013-10-22 Points of View in the Modern History of Psychology is a collection of papers that presents each individual contributor's expert knowledge of history in the field of psychology. One paper examines Wilhelm Wundt's concept of psychology as the propaedeutic science surviving and inspiring a generation or more of psychologists. Another paper discusses the early sources and the basic conceptions of functionalism as used in America. John B. Watson proclaims behaviorism as a new discipline in psychology with defining features, such as an objective, deterministic, scientific, and experimental method that can be used in both human and animal studies. Lieberman (1979), Mackenzie (1977) Miller, Galanter, and Pribram (1960) oppose behaviorism on the grounds that it slights the purpose of psychology, and focuses more on methodology to the detriment of theory. One paper notes that the acceptance or influence that a point of view has is based in some ways on the range and clarity of its connections with experimental and observational reality. This collection can prove useful for psychologists, behavioral scientists, psychiatrists, psycho-analysts, students of psychology, philosophy or general history who are interested in the many viewpoints of psychology.

Pediatric Ocular Surface Disease Aisha Traish, Vivian Paraskevi Douglas, 2023-06-27 Ocular surface diseases in children have not always been well understood and the literature in this age group is limited. The consequences of misdiagnosis and delayed diagnosis include visually significant scarring and amblyopia, thus with real impact on their quality of life and ultimate visual potential. Recently, there has been an increase in clinical and research focus on these diseases, contributing to a growing awareness of their importance to pediatric visual health. This book is the first comprehensive volume dedicated to pediatric ocular surface diseases. It provides an up-to-date and highly illustrated discussion of the pathophysiology, symptomatology and diagnostic and therapeutic strategies of these less commonly understood diseases, in a format that is readily absorbed by trainees and seasoned physicians alike. The aim of this book is to provide a practical and detailed understanding of ocular surface disease in the pediatric population, as many of these corneal conditions in children require unique therapeutic approaches and may have subtle presentations. Chapters will address key issues, such as dry eye disease, Steven Johnson Syndrome and neurotrophic keratitis, that can have a profound impact on children's visual and social development. Pediatric Ocular Surface Disease is a must-have resource for pediatric ophthalmology fellows, cornea fellows, pediatric ophthalmologists, and cornea specialists.

Communimetrics John S. Lyons, 2009-06-19 Measurement in human services means one thing: how well the effort serves clients. But the data doesn't exist in a vacuum and must be communicated clearly between provider and client, provider and management, and across systems. During the past decade, innovative communimetric measures have helped more than 50,000 professionals worldwide in health care, justice, and business settings deliver findings that enhance communication on all sides. Now, the theory and methods behind this fast-paced innovation are available in this informative volume. Communimetrics presents information in an accessible style, and its model of measurement as communication bolsters transparency and ease of interpretation without sacrificing validity or reliability. It conveys a deep appreciation for the unique position of service delivery systems at the intersection between science and management (and between quality and quantity), and shows readers how to create measures that can be used immediately to translate findings into practical action. This must-have volume offers readers the tools for understanding—and applying—this cutting-edge innovation by providing: The theoretical base for communimetrics. Practical illustrations comparing communimetrics with traditional methods. Guidelines for designing communimetric measures and evaluating their reliability and validity. Detailed examples of three widely used communimetric measures—the Child and Adolescent Needs and Strengths (CANS), the INTERMED, and the Entrepreneurial League System Assessment as well as detailed explanations for how they are used and why they work. Applications used in a range of settings, including children's services, adult mental health, services for the aging, and business and organizational development. Communimetrics provides a wealth of real-world uses to a wide professional audience, including program evaluators, quality management professionals, enterprise managers, teachers of field research methods, and professionals involved in measurement and management design. It also makes an exceptionally useful text for program evaluation courses.

Man, Play, and Games Roger Caillois, 2001 According to Roger Caillois, play is an occasion of pure waste. In spite of this - or because of it - play constitutes an essential element of human social and spiritual development. In this study, the

author defines play as a free and voluntary activity that occurs in a pure space, isolated and protected from the rest of life.

Conducting Qualitative Research of Learning in Online Spaces Hannah R. Gerber, Sandra Schamroth Abrams, Jen Scott Curwood, Alecia Marie Magnifico, 2016-03-17 Qualitative researchers have grappled with how online inquiry shifts research procedures such as gaining access to spaces, communicating with participants, and obtaining informed consent. Drawing on a multimethod approach, *Conducting Qualitative Research of Learning in Online Spaces* explores how to design and conduct diverse studies in online environments. Authors Hannah R. Gerber, Sandra Schamroth Abrams, Jen Scott Curwood, and Alecia Marie Magnifico focus on formal and informal learning practices that occur in evolving online spaces. The text shows researchers how they can draw upon a variety of theoretical frameworks, methodological approaches, and data sources. Examples of qualitative research in online spaces, along with guiding questions, support readers at every phase of the research process.

"A terrific mixture of objective information as well as factual data make this book an easy, informative, and interesting read." --Review from a 4th year Medical Student

The End of Normal Lennard Davis, 2014-01-03 In an era when human lives are increasingly measured and weighed in relation to the medical and scientific, notions of what is "normal" have changed drastically. While it is no longer useful to think of a person's particular race, gender, sexual orientation, or choice as "normal," the concept continues to haunt us in other ways. In *The End of Normal*, Lennard J. Davis explores changing perceptions of body and mind in social, cultural, and political life as the twenty-first century unfolds. The book's provocative essays mine the worlds of advertising, film, literature, and the visual arts as they consider issues of disability, depression, physician-assisted suicide, medical diagnosis, transgender, and other identities. Using contemporary discussions of biopower and biopolitics, Davis focuses on social and cultural production—particularly on issues around the different body and mind. *The End of Normal* seeks an analysis that works comfortably in the intersection between science, medicine, technology, and culture, and will appeal to those interested in cultural studies, bodily practices, disability, science and medical studies, feminist materialism, psychiatry, and psychology.

Operative Gynecologic Endoscopy Joseph Sanfilippo, Roland L. Levine, 1996-04-25 *Operative Gynecologic Endoscopy*, Second Edition is completely revised and expanded with 17 new chapters that provide, step-by-step, the latest operative techniques for both laparoscopic AND hysteroscopic procedures.
