Stretching Boundaries: Cases in Organizational and Managerial Communication Jeremy Fyke, Jeralyn Faris, Patrice M. Buzzanell, 2016-08-05 Stretching Boundaries: Cases in Organizational and Managerial Communication focuses on non-traditional organizations in a variety of contexts. Because cases range from small family-owned entrepreneurships and cybervetting to provincial e-government democratic movements in China, this supplemental text enables a reexamination of the boundaries of traditional organizational contexts. Cases delve into organizing structures, relationships, and visions for global not-for-profits, hybrid, creative industry, and entrepreneurial organizations. This book stands to benefit instructors and students in at least four ways. First, it provides instructors with an application-based teaching tool to help spark discussion. Second, students will find the case studies interesting and applicable to their future

work lives, especially undergraduates who will soon be in the work force. Additionally, cases help students grasp course materials that may be otherwise challenging. Finally, for graduate students, the book encourages reflection on important topics for future research.

The Situated Organization James R. Taylor, Elizabeth J. Van Every, 2010-09-13 The *Situated Organization* explores recent research in organizational communication, emphasizing the organization as constructed in and emerging out of communication practices. Working from the tradition of the Montreal School in its approach, it focuses not only on how an organization's members understand the purposes of the organization through communication, but also on how they realize and recognize the organization itself as they work within it. The text breaks through with an alternative viewpoint to the currently popular idea of 'organization-as-network,' viewing organization instead as a configuration of agencies, and their fields of practice. It serves as an original, comprehensive, and well-written text, elaborated by case studies that make the theory come to life. The substantial ideas and insights are presented in a deep and meaningful way while remaining comprehensible for student readers. This text has been developed for students at all levels of study in organizational communication, who need a systematic introduction to conducting empirical field research. It will serve as an invaluable sourcebook in planning and conducting research.

The Agency of Organizing Boris H. J. M. Brummans, 2017-09-13 Winner of the 2018 Outstanding Edited Book Award from the Organizational Communication Division of the National Communication Association The Agency of Organizing explains why the notion of agency is central to understanding what organizations are, how they come into existence, continue to exist, or fade away, and how they function. Written by leading organizational communication scholars, the chapters in this edited volume present seven different theoretical perspectives on agency in the dynamics of organizing. Authors discuss how they conceptualize agency from their own perspective and how they propose to investigate agency empirically in processes of organizing by using specific methods. Through insightful case studies, they demonstrate the value of these perspectives for organizational research and practice.
