THE INDIAN LISTENER

Each number is the catalogue of a specific school or college of the University.

University of Michigan Official Publication

The evolution of distance education in India in forms of dual mode, single mode and consortia has been phenomenal. The system today is one of the largest distance education networks in the world comprising dual mode university distance education institutes, single mode open universities, dual mode secondary education, single mode open schools, distance education council/consortium, and many private and semi-government providers of education and training. The four generations of distance education have been implemented in a variety of forms and models, and the system exhibits adoption of innovative practices in course design, development, delivery, evaluation, media networking, and planning and management which have proved effective in addressing the issues of access and equity, economy, quality and reform in the country, and which have been adapted/emulated by a host of such systems in the developing world. It is, therefore, imperative at this stage to reflect on the developments of above four decades of distance education in this country, and map its future expansion. Each chapter in the volume reflects on the concerned theme covering the distance education system in the country, traces the limitations and

adoption of innovative strategies to address the issues, and introspect on its future possibilities.

Press in India

This study draws from postcolonial theory, science fiction criticism, utopian studies, genre theory, Western and Indian philosophy and history to propose that Indian science fiction functions at the intersection of Indian and Western cultures. The author deploys a diachronic and comparative approach in examining the multilingual science fiction traditions of India to trace the overarching generic evolutions, which he complements with an analysis of specific patterns of hybridity in the genre's formal and thematic elements - time, space, characters and the epistemologies that build the worlds in Indian science fiction. The work explores the larger patterns and connections visible despite the linguistic and cultural diversities of Indian science fiction traditions.
