The use of cognitive science in creating stories, languages, visuals, and characters is known as narrative generation, and it has become a trending area of study. Applying artificial intelligence (AI) techniques to story development has caught the attention of professionals and researchers; however, few studies have inherited techniques used in previous literary methods and related research in social sciences. Implementing previous narratology theories to current narrative generation systems is a research area that remains unexplored. Bridging the Gap Between AI, Cognitive Science, and Narratology With Narrative Generation is a collection of innovative research on the analysis of current practices in narrative generation systems by combining previous theories in narratology and literature with current methods of AI. The book bridges the gap between AI, cognitive science, and narratology with narrative generation in a broad sense, including other content generation, such as novels, poems, movies, computer games, and advertisements. The book emphasizes that an important method for bridging the gap is based on designing and implementing computer programs using knowledge and methods of narratology and literary theories. In order to present an organic, systematic, and integrated combination of both the fields to develop a new research area, namely post-narratology, this book has an important place in the creation of a new research area and has an impact on both narrative generation studies, including AI and cognitive science, and narrative studies, including narratology and literary theories. It is ideally designed for academicians, researchers, and students, as well as enterprise practitioners, engineers, and creators of diverse content generation fields such as advertising production, computer game creation, comic and manga writing, and movie production.

Fleeing a chain of vengeful pursuers that includes Mexican bandits, the French Foreign Legion, and the relatives of an infatuated Austrian beauty, Flashy is desperate for somewhere to take cover. Along the way, of course, are nightmare castles, brigands, massacres, rebellions, orgies, and the loveliest and most lethal women in Africa, all of which will test the limits of the great bounder's talents for knavery, amorous intrigue, and survival. Flashman on the March—the twelfth book in George MacDonald Fraser's ever-beloved, always scandalous Flashman Papers series—is Flashman and Fraser at their best.

### **A World to Build**

The Bible has a way of shocking us. If Americans could still blush, we might blush at the words, "Rejoice in the wife of your youth, a lovely deer, a graceful doe. Let her breasts fill you at all times with delight; be intoxicated always in her love" (Proverbs 5:18-19). But, of course, sin always tries to trash God's gifts. So we can't just celebrate sex for what God made it to be; we have to fight what sin turned it into. The contributors to this unique volume encourage you to do both: celebrate and struggle. This book has something for all-men and women, married and single—from contributors like John Piper, C. J. and Carolyn Mahaney, Mark Dever, Al Mohler, Carolyn McCulley, and others.

### **Finding Mr. Right**

A "fascinating and terrifying" memoir of one woman's extraordinary effort to save her husband's life (Scientific American) -- and the discovery of a forgotten cure that has the potential to save millions more. Epidemiologist Steffanie Strathdee and her husband, psychologist Tom Patterson, were vacationing in Egypt when Tom came down with a stomach bug. What at first seemed like a case of food poisoning quickly turned critical, and by the time Tom had been transferred via emergency medevac to the world-class medical center at UC San Diego, where both he and Steffanie worked, blood work revealed why modern medicine was failing: Tom was fighting one of the most dangerous, antibiotic-resistant bacteria in the world. Frantic, Steffanie combed through research old and new and came across phage therapy: the idea that the right virus, aka "the perfect predator," can kill even the most lethal bacteria. Phage treatment had fallen out of favor almost 100 years ago, after antibiotic use went mainstream. Now, with time running out, Steffanie appealed to phage researchers all over the world for help. She found allies at the FDA, researchers from Texas A&M, and a clandestine Navy biomedical center -- and together they resurrected a forgotten cure. A nail-biting medical mystery, *The Perfect Predator* is a story of love and survival against all odds, and the (re)discovery of a powerful new weapon in the global superbug crisis.

### If I Ran the Zoo

The Fortean Research Center was founded in Lincoln, Nebraska in 1982. During the two decades of its existence, this volunteer group of researchers and investigators delved deep into the unexplained. Here is the entire collection of the Journal of the Fortean Research Center, 23 issues in all. Building on the tradition of Little Bee, Chris Cleave again writes with elegance, humor, and passion about friendship, marriage, parenthood, tragedy, and redemption. What would you sacrifice for the people you love? KATE AND ZOE met at nineteen when they both made the cut for the national training program in track cycling—a sport that demands intense focus, blinding exertion, and unwavering commitment. They are built to exploit the barest physical and psychological edge over equally skilled rivals, all of whom are fighting for the last one tenth of a second that separates triumph from despair. Now at thirty-two, the women are facing their last and biggest race: the 2012 Olympics. Each wants desperately to win gold, and each has more than a medal to lose. Kate is the more naturally gifted, but the demands of her life have a tendency to slow her down. Her eight-year-old daughter Sophie dreams of the Death Star and of battling alongside the Rebels as evil white blood cells ravage her personal galaxy—she is fighting a recurrence of the leukemia that nearly killed her three years ago. Sophie doesn’t want to stand in the way of her mum’s Olympic dreams, but each day the dark forces of the universe seem to be massing against her. Devoted and self-sacrificing Kate knows her daughter is fragile, but at the height of her last frenzied months of training, might she be blind to the most terrible prognosis? Intense, aloof Zoe has always hovered on the periphery of real human companionship, and her compulsive need to win at any cost has more than once threatened her friendship with Kate—and her own sanity. Will she allow her obsession, and the advantage she has over a harried, anguished mother, to sever the bond they have shared for more than a decade? Echoing the adrenaline-fueled rush of a race around the Velodrome track, Gold is a triumph of superbly paced, heart-in-throat storytelling. With great humanity and glorious prose, Chris Cleave examines the values that lie at the heart of our most intimate relationships, and the choices we make when lives are at stake and everything is on the line.

## Journal of the Fortean Research Center Paperbound

Who Is the Holy Spirit—and Why Do You Need Him in Your Life? After His crucifixion and resurrection, Jesus gave His disciples an assignment to change the world—but told them to wait until the power of the Holy Spirit had come upon them before setting out. His charge to modern-day believers is no different: To do the works that Jesus did (and even greater ones, as He said), it is imperative that we operate from the indwelling power of the Holy Spirit. But Who is this mysterious Third Person of the Trinity? How do we get this power, and what are we to do with it when we receive it? Pat Robertson, founder of the Christian Broadcasting Network and beloved longtime host of The 700 Club, tackles these questions and many others in this, the final book of a life that is now in its ninth decade. Robertson traces the path of the Holy Spirit through both the Old and New Testaments, and shares stories from his own life and that of many 700 Club viewers testifying to how the power of the Holy Spirit has miraculously freed and healed them today. If you want a better understanding of the Holy Spirit and are hungry to know more about the power that is available through Him to every Christfollower today, this book is for you.

## Messy Vintage

This edition collects both volumes of Austerity Britain together for the first time 'This is a classic; buy at least three copies - one for yourself and two to give to friends and family' Guardian The first book in the groundbreaking series that tells the story of Britain from VE Day in 1945 to the coming of Margaret Thatcher in 1979 as never before Coursing through Austerity Britain is an astonishing variety of voices - vivid, unselfconscious, and unaware of what the future holds. A Chingford housewife endures the tribulations of rationing; a retired schoolteacher observes during a royal visit how well-fed the Queen looks; a pernickety civil servant in Bristol is oblivious to anyone's troubles but his own. An array of working-class witnesses describe how life in post-war Britain is, with little regard for liberal niceties or the feelings of their 'bettters'. Many of these voices will stay with the reader in future volumes, jostling alongside well-known figures like John Arlott (here making his first radio broadcast, still in police uniform), Glenda Jackson (taking the 11+) and Doris Lessing, newly arrived from Africa, struck by the levelling poverty of postwar Britain. David Kynaston weaves a sophisticated narrative of how the victorious 1945 Labour government shaped the political, economic and social landscape for the next three decades. Deeply researched, often amusing and always intensely entertaining and readable, the first volume of David Kynaston's ambitious history offers an entirely fresh perspective on Britain during those six momentous years.
