The Elements of Style (also called Strunk & White) is a style guide for formal grammar used in American English writing. The first publishing was written by William Strunk Jr. in 1918, and published by Harcourt in 1920, comprising eight "elementary rules of usage," ten "elementary principles of composition," "a few matters of form," a list of 49 "words and expressions commonly misused," and a list of 57 "words often misspelled." Writer and editor E. B. White greatly enlarged and revised the book for publication by Macmillan in 1959. That was the first edition of the book, which Time recognized in 2011 as one of the 100 best and most influential non-fiction books written in English since 1923.

American wit Dorothy Parker said, regarding the book: If you have any young friends who aspire to...

Outline of logic

In The Dictionary of the History of Ideas. Logic test Test your logic skills Logic Self-Taught: A Workbook (originally prepared for on-line logic instruction)

Logic is the formal science of using reason and is considered a branch of both philosophy and mathematics and to a lesser extent computer science. Logic investigates and classifies the structure of statements and arguments, both through the study of formal systems of inference and the study of arguments in natural language. The scope of logic can therefore be very large, ranging from core topics such as the study of fallacies and paradoxes, to specialized analyses of reasoning such as probability, correct reasoning, and arguments involving causality. One of the aims of logic is to identify the correct (or valid) and incorrect (or fallacious) inferences. Logicians study the criteria for the evaluation of arguments.

Persian, also known by its endonym Farsi, is a Western Iranian language belonging to the Iranian branch of the Indo-Iranian subdivision of the Indo-European languages. Persian is a pluricentric language predominantly spoken and used officially within Iran, Afghanistan, and Tajikistan in three mutually intelligible standard varieties, respectively Iranian Persian (officially known as Persian), Dari Persian (officially known as Dari since 1964), and Tajiki Persian (officially known as Tajik since 1999). It is also spoken natively in the Tajik variety by a significant population within Uzbekistan, as well as within other regions with a Persianate history in the cultural sphere of Greater Iran. It is written officially within Iran and Afghanistan in the Persian alphabet, a derivative of the Arabic...

Pāli (, IAST: pāṭi) is a classical Middle Indo-Aryan language of the Indian subcontinent. It is widely studied because it is the language of the Buddhist Pāli Canon or Tipiṭaka as well as the sacred language of Theravāda Buddhism. Pali was designated as a classical language by the Government of India on 3 October 2024.

Gender neutrality in languages with gendered third-person pronouns

A third-person pronoun is a pronoun that refers to an entity other than the speaker or listener. Some languages, such as Slavic, with gender-specific pronouns have them as part of a grammatical gender system, a system of agreement where most or all nouns have a value for this grammatical category. A few languages with gender-specific pronouns, such as English, Afrikaans, Defaka, Khmu, Malayalam, Tamil, and Yazgulyam, lack grammatical gender; in such languages, gender usually adheres to "natural gender", which is often based on biological sex. Other languages, including most Austronesian languages, lack gender distinctions in personal pronouns entirely, as well as any system of grammatical gender.

In languages with pronominal gender, problems of usage may arise in contexts where a person of...

Square

Project Mathematics! Program Guide and Workbook: Similarity. California Institute of Technology. p. 8–9. Workbook accompanying Project Mathematics! Ep.

In geometry, a square is a regular quadrilateral. It has four straight sides of equal length and four equal angles. Squares are special cases of rectangles, which have four equal angles, and of rhombuses, which have four equal sides. As with all rectangles, a square's angles are right angles (90 degrees, or $\pi/2$ radians), making adjacent sides perpendicular. The area of a square is the side length multiplied by itself, and so in algebra, multiplying a number by itself is called squaring.

Equal squares can tile the plane edge-to-edge in the square tiling. Square tilings are ubiquitous in tiled floors and walls, graph paper, image pixels, and game boards. Square shapes are also often seen in building floor plans, origami paper, food servings, in graphic design and heraldry, and in instant photos...

Michael Servetus (; Spanish: Miguel Servet; French: Michel Servet; also known as Michel Servetus, Miguel de Villanueva, Revés, or Michel de Villeneuve; 29 September 1509 or 1511 – 27 October 1553) was a Spanish theologian, physician, cartographer, and Renaissance humanist. He was the first European to correctly describe the function of pulmonary circulation, as discussed in *Christianismi Restitutio* (1553). He was a polymath versed in many sciences: mathematics, astronomy and meteorology, geography, human anatomy, medicine and pharmacology, as well as jurisprudence, translation, poetry, and the scholarly study of the Bible in its original languages.

He is renowned in the history of several of these fields, particularly medicine. His work on the circulation of blood and his observations on pulmonary...

Drawing up a comprehensive list of words in English is important as a reference when learning a language as it will show the equivalent words you need to learn in the other language to achieve fluency. A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself. Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource. You can use the list to generate your own lists in whatever language you're learning and to test yourself.
