Echo Cycle Patrick Edwards, 2020-03-10 Gladiator meets 1984 in this near-future thriller featuring timeslips, ancient magic and a disturbingly plausible dystopian Britain... 68 CE Fleeing disaster, young Winston Monk wakes to find himself trapped in the past, imprisoned by the mad Emperor Nero. The Roman civilization he idolized is anything but civilized, and his escape from a barbaric home has led him somewhere far more dangerous. 2070 CE As the European Union crumbled, Britain closed its borders, believing they were stronger alone. After decades of hardship, British envoy Lindon Banks joins a diplomatic team to rebuild bridges with the hypermodern European Confederacy. But in Rome, Banks discovers his childhood friend who disappeared without a trace. Monk appears to have spent the last two decades living rough, but he tells a different story: a tale of Caesars, slavery and something altogether more sinister. Monk's mysterious emergence sparks the tinderbox of diplomatic relations between Britain and the Confederacy, controlled by shadowy players with links back to the ancient world itself...

The Fortunate Ones Ed Tarkington, 2021-01-05 “The Fortunate Ones feels like a fresh and remarkably sure-footed take on *The Great Gatsby*, examining the complex costs of attempting to transcend or exchange your given class for a more gilded one. Tarkington’s understanding of the human heart and mind is deep, wise, and uncommonly empathetic. As a novelist, he is the real deal. I can’t wait to see this story reach a wide audience, and to see what he does next.” —Paula McLain, author of *The Paris Wife* When Charlie Boykin was young, he thought his life with his single mother on the working-class side of Nashville was perfectly fine. But when his mother arranges for him to be admitted as a scholarship student to an elite private school, he is suddenly introduced to what the world can feel like to someone cushioned by money. That world, he discovers, is an almost irresistible place where one can bend—and break—rules and still end up untarnished. As he gets drawn into a friendship with a charismatic upperclassman, Archer Creigh, and an affluent family that treats him like an adopted son, Charlie quickly adapts to life in the upper echelons of Nashville society. Under their charming and alcohol-soaked spell, how can he not relax and enjoy it all—the lack of anxiety over money, the easy summers spent poolside at perfectly appointed mansions, the lavish parties, the freedom to make mistakes knowing that everything can be glossed over or fixed? But over time, Charlie is increasingly pulled into covering for Archer’s constant deceptions and his casual bigotry. At what point will the attraction of wealth and prestige wear off enough for Charlie to take a stand—and will he? *The Fortunate Ones* is an immersive, elegantly written story that conveys both the seductiveness of this world and the corruption of the people who see their ascent to the top as their birthright.

Weeknights with Giada Giada De Laurentiis, 2012-03-27 Giada De Laurentiis is one of America’s most-loved culinary stars, adored for her Food Network hit shows and her New York Times bestselling cookbooks alike, both of which feature her fresh, flavorful Italian recipes. For the first time, Giada tackles weeknight cooking, sharing her favorite tips and go-to

dishes—all in her vibrant signature style—to get a delicious meal on the table in a flash. After a full day, Giada, like most parents, wants nothing more than to sit down for a home-cooked dinner with her husband, Todd, and their daughter, Jade. Weeknights with Giada rises to the challenge, delivering soups, sandwiches, pizzas, pastas, and meat and fish dishes that come together quickly as stand-alone main courses—most in half an hour or less: Rustic Vegetable and Polenta Soup, a hearty soul-warming one-pot dish, cooks in under twenty minutes; Lemony White Bean, Tuna, and Arugula Salad is a great meal that's quickly assembled from pantry and fridge essentials; Spicy Linguini with Clams and Mussels is a fifteen-minute-or-less spectacular pasta; and you can't beat Grilled Sirloin Steaks with Pepper and Caper Salsa, which are also ready in just fifteen minutes. From inventive breakfast-for-dinner dishes and meatless Monday vegetarian recipes—both weekly traditions in Giada's house—to picnic sandwiches and hearty salad recipes for reinventing leftovers, Weeknights with Giada reveals every secret in her repertoire. Even the desserts are quick to mix and bake, should a craving—or a last-minute school bake sale—strike. Here is Giada at her most inventive—and at her most laid-back. Flavor, freshness, and fun take center stage while cooking times, pots dirtied, and stress are kept to a minimum. With gorgeous color photographs and intimate home snapshots of Giada and her family, Weeknights with Giada is a welcome handbook of fantastic recipes and surefire Monday-to-Friday strategies for every home cook.

Driving to Net 0 David Hrivnak, 2018-09-15 Scientists say we need to reduce our use of fossil fuels by 80% or more to avert the most dangerous effects of global warming. But is such a drastic cut possible without totally disrupting our lifestyle? The short answer is yes as the contributors of this book have shown. They imagined a future where each home powers not only itself, but the cars surrounding it. They are doing this with no fumes, no soot, and no emissions, from a fuel source that will never run out or jump in price. They show this future is possible now as they are driving to net 0.

Electrochemical Energy Storage for Renewable Sources and Grid Balancing Patrick T. Moseley, Jürgen Garche, 2014-10-27 Electricity from renewable sources of energy is plagued by fluctuations (due to variations in wind strength or the intensity of insolation) resulting in a lack of stability if the energy supplied from such sources is used in 'real time'. An important solution to this problem is to store the energy electrochemically (in a secondary battery or in hydrogen and its derivatives) and to make use of it in a controlled fashion at some time after it has been initially gathered and stored. Electrochemical battery storage systems are the major technologies for decentralized storage systems and hydrogen is the only solution for long-term storage systems to provide energy during extended periods of low wind speeds or solar insolation. Future electricity grid design has to include storage systems as a major component for grid stability and for security of supply. The technology of systems designed to achieve this regulation of the supply of renewable energy, and a survey of the markets that they will serve, is the subject of this book. It includes economic aspects to guide the development of technology in the right direction. - Provides state-of-the-art information on all of the storage systems together with an assessment of

competing technologies - Features detailed technical, economic and environmental impact information of different storage systems - Contains information about the challenges that must be faced for batteries and hydrogen-storage to be used in conjunction with a fluctuating (renewable energy) power supply

Acoustemologies in Contact Emily Wilbourne, Suzanne G. Cusick, 2021-01-19 In this fascinating collection of essays, an international group of scholars explores the sonic consequences of transcultural contact in the early modern period. They examine how cultural configurations of sound impacted communication, comprehension, and the categorisation of people. Addressing questions of identity, difference, sound, and subjectivity in global early modernity, these authors share the conviction that the body itself is the most intimate of contact zones, and that the culturally contingent systems by which sounds made sense could be foreign to early modern listeners and to present day scholars. Drawing on a global range of archival evidence—from New France and New Spain, to the slave ships of the Middle Passage, to China, Europe, and the Mediterranean court environment—this collection challenges the privileged position of European acoustical practices within the discipline of global-historical musicology. The discussion of Black and non-European experiences demonstrates how the production of ‘the canon’ in the cosmopolitan centres of colonial empires was underpinned by processes of human exploitation and extraction of resources. As such, this text is a timely response to calls within the discipline to decolonise music history and to contextualise the canonical works of the European past. This volume is accessible to a wide and interdisciplinary audience, not only within musicology, but also to those interested in early modern global history, sound studies, race, and slavery.

Dark Rivers of the Heart Dean Koontz, 2012-06-26 NEW YORK TIMES BESTSELLER Do you dare step through the red door? Spencer Grant had no idea what drew him to the bar with the red door. He thought he would just sit down, have a slow beer or two, and talk to a stranger. He couldn't know that it would lead to a narrow escape from a bungalow targeted by a SWAT team. Or that it would leave him a wanted man. But now Spencer is on the run from mysterious and ruthless men. He is in love with a woman he knows next to nothing about. And he is hiding from a past he can't fully remember. On his trail is a shadowy security agency that answers to no one—including the U.S. government—and a man who considers himself a compassionate Angel of Death. But worst of all, Spencer Grant is on a collision course with inner demons he thought he'd buried years ago—inner demons that could destroy him if his enemies don't first.
