One Teenager at a Time Kari O'Driscoll,2019-08-01 This book is a social-emotional education manual for middle and high school educators. The curriculum contained in this book is innovative, creative, and draws on the most current research in education, mindfulness, and adolescent brain development. It will add a vital piece to the growth and development of middle and high school students as it offers them "soft skills" they will need as they navigate higher education and the workforce. It offers no Right/Wrong solutions and instead helps adolescents explore their own values and beliefs in a shared space that allows for an honest exchange of ideas. Content areas include Compassion, Mindfulness, Self-Worth, Positive Mindset, and Dealing with Stress, Anxiety, and Fear. Each lesson addresses more than one of the CASEL guidelines for

social-emotional health, with an appendix mapping the specific skills to each lesson. Educators will find the lessons flexible in that there is no specific progression or required format. They can be delivered in one sitting or across several smaller time periods such as homeroom or advisory periods.

Sticks and Stones Emily Bazelon, 2014-02-11 NATIONAL BESTSELLER Being a teenager has never been easy, but in recent years, with the rise of the Internet and social media, it has become exponentially more challenging. Bullying, once thought of as the province of queen bees and goons, has taken on new, complex, and insidious forms, as parents and educators know all too well. No writer is better poised to explore this territory than Emily Bazelon, who has established herself as a leading voice on the social and legal aspects of teenage drama. In *Sticks and Stones*, she brings readers on a deeply researched, clear-eyed journey into the ever-shifting landscape of teenage meanness and its sometimes devastating consequences. The result is an indispensable book that takes us from school cafeterias to courtrooms to the offices of Facebook, the website where so much teenage life, good and bad, now unfolds. Along the way, Bazelon defines what bullying is and, just as important, what it is not. She explores when intervention is essential and when kids should be given the freedom to fend for themselves. She also dispels persistent myths: that girls bully more than boys, that online and in-person bullying are entirely distinct, that bullying is a common cause of suicide, and that harsh criminal penalties are an effective deterrent. Above all, she believes that to deal with the problem, we must first understand it. Blending keen journalistic and narrative skills, Bazelon explores different facets of bullying through the stories of three young people who found themselves caught in the thick of it. Thirteen-year-old Monique endured months of harassment and exclusion before her mother finally pulled her out of school. Jacob was threatened and physically attacked over his sexuality in eighth grade—and then sued to protect himself and change the culture of his school. Flannery was one of six teens who faced criminal charges after a fellow student's suicide was blamed on bullying and made international headlines. With grace and authority, Bazelon chronicles how these kids' predicaments escalated, to no one's benefit, into community-wide wars. Cutting through the noise, misinformation, and sensationalism, she takes us into schools that have succeeded in reducing bullying and examines their successful strategies. The result is a groundbreaking book that will help parents, educators, and teens themselves better understand what kids are going through today and what can be done to help them through it. Contains a new discussion guide for classroom use and book groups Praise for *Sticks and Stones* "Intelligent, rigorous . . . [Emily Bazelon] is a compassionate champion for justice in the domain of childhood's essential unfairness."—Andrew Solomon, *The New York Times Book Review* "[Bazelon] does not stint on the psychological literature, but the result never feels dense with studies; it's immersive storytelling with a sturdy base of science underneath, and draws its authority and power from both."—*New York Times* "A humane and closely reported exploration of the way that hurtful power relationships play out in the contemporary public-school setting . . . As a parent herself, [Bazelon] brings clear, kind analysis to complex and upsetting circumstances."—*The*

Wall Street Journal “Bullying isn’t new. But our attempts to respond to it are, as Bazelon explains in her richly detailed, thought-provoking book. . . . Comprehensive in her reporting and balanced in her conclusions, Bazelon extracts from these stories useful lessons for young people, parents and principals alike.”—The Washington Post

Preventing Bullying Through Science, Policy, and Practice National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Board on Children, Youth, and Families, Committee on the Biological and Psychosocial Effects of Peer Victimization: Lessons for Bullying Prevention, 2016-09-14 Bullying has long been tolerated as a rite of passage among children and adolescents. There is an implication that individuals who are bullied must have asked for this type of treatment, or deserved it. Sometimes, even the child who is bullied begins to internalize this idea. For many years, there has been a general acceptance and collective shrug when it comes to a child or adolescent with greater social capital or power pushing around a child perceived as subordinate. But bullying is not developmentally appropriate; it should not be considered a normal part of the typical social grouping that occurs throughout a child's life. Although bullying behavior endures through generations, the milieu is changing. Historically, bullying has occurred at school, the physical setting in which most of childhood is centered and the primary source for peer group formation. In recent years, however, the physical setting is not the only place bullying is occurring. Technology allows for an entirely new type of digital electronic aggression, cyberbullying, which takes place through chat rooms, instant messaging, social media, and other forms of digital electronic communication. Composition of peer groups, shifting demographics, changing societal norms, and modern technology are contextual factors that must be considered to understand and effectively react to bullying in the United States. Youth are embedded in multiple contexts and each of these contexts interacts with individual characteristics of youth in ways that either exacerbate or attenuate the association between these individual characteristics and bullying perpetration or victimization. Recognizing that bullying behavior is a major public health problem that demands the concerted and coordinated time and attention of parents, educators and school administrators, health care providers, policy makers, families, and others concerned with the care of children, this report evaluates the state of the science on biological and psychosocial consequences of peer victimization and the risk and protective factors that either increase or decrease peer victimization behavior and consequences.
