Uneven Roads helps students grasp how, when, and why race and ethnicity matter in U.S. politics. Using the metaphor of a road, with twists, turns, and dead ends, this incisive text takes students on a journey to understanding political racialization and the roots of modern interpretations of race and ethnicity. The book's structure and narrative are designed to encourage comparison and reflection. Students critically analyze the history and context of U.S. racial and ethnic politics to build the skills needed to draw their own conclusions. In the Third Edition of this groundbreaking text, authors Shaw, DeSipio, Pinderhughes, Frasure, and Travis bring the historical narrative to life by addressing the most contemporary debates and challenges affecting U.S. racial and ethnic politics. Students will explore important issues regarding voting rights, political representation, education and criminal justice policies, and the immigrant experience.

My Road of Life Sabir Rustamkhanli,2013-04-19 My Road of Life is his last work written during the Soviet rule. This book treasures love; love of everyone, love to motherland, history, culture. The book speaks out for the whole Azerbaijani people expressing its benevolent nature and good will. The 90s of the last century marked Azerbaijan's history with independence from the Soviet regime and greatly contributed to introduce My Road of Life as one of the cult books of those times, spreading thoughts and spirit of liberty, independence, nation's self-governance. Fighters for independence used to come to The Liberty Square in Baku with this book in their hands to demand the end of the authoritarian Soviet dominance. The book encouraged the young generation of those times to rise and wage the just struggle for future and signaled the complete destruction of the humiliating Soviet dictatorship. Today My Road of Life is a valued relic echoing the ardent freedom-loving spirit of the Azerbaijani people on their long way to hard-fought victory.

Road and Off-Road Vehicle System Dynamics Handbook Gianpiero Mastinu,Manfred Ploechl,2014-01-06 Featuring contributions from leading experts, the Road and Off-Road Vehicle System Dynamics Handbook provides comprehensive, authoritative coverage of all the major issues involved in road vehicle dynamic behavior. While the focus is on automobiles, this book also highlights motorcycles, heavy commercial vehicles, and off-road vehicles. The authors of the individual chapters, both from automotive industry and universities, address basic issues, but also include references to significant papers for further reading. Thus the handbook is devoted both to the beginner, wishing to acquire basic knowledge on a specific topic, and to the experienced engineer or scientist, wishing to have up-to-date information on a particular subject. It can also be used as a textbook for master courses at universities. The handbook begins with a short history of road and off-road vehicle dynamics followed by detailed, state-of-the-art chapters on modeling, analysis and optimization in vehicle system dynamics, vehicle concepts and aerodynamics, pneumatic tires and contact wheel-road/off-road, modeling vehicle subsystems, vehicle dynamics and active safety, man-vehicle interaction, intelligent vehicle systems, and road accident reconstruction and passive safety. Provides extensive coverage of modeling, simulation, and analysis techniques Surveys all vehicle subsystems from a vehicle dynamics point of view Focuses on pneumatic tires and contact wheel-road/off-road Discusses intelligent vehicle systems technologies and active safety Considers safety factors and accident reconstruction procedures Includes chapters written by leading experts from all over the world This text provides an applicable source of information for all people interested in a deeper understanding of road vehicle dynamics and related problems.

Disability and Social Change Brian Watermeyer,2006 This powerful volume represents the broadest engagement with disability issues in South Africa yet. Themes include theoretical approaches to, and representations of, disability; governmental and civil society responses to disability issues; aspects of education as these pertain to the oppression/liberation of disabled people; social security for disabled people; the complex politics permeating service

provision relationships; and a consideration of disability in relation to human spaces - physical, economic and philosophical. Firmly located within the social model of disability, this collection resonates powerfully with contemporary thinking and research in the disability field and sets a new benchmark for cutting-edge debates in a transforming South Africa.

Dynamic Stability and Control of Tripped and Untripped Vehicle Rollover Zhilin Jin,Bin Li,Jingxuan Li,2022-06-01 Vehicle rollover accidents have been a serious safety problem for the last three decades. Although rollovers are a small percentage of all traffic accidents, they do account for a large proportion of severe and fatal injuries. Specifically, some large passenger vehicles, such as large vans, pickup trucks, and sport utility vehicles, are more prone to rollover accidents with a high center of gravity (CG) and narrow track width. Vehicle rollover accidents may be grouped into two categories: tripped and untripped rollovers. A tripped rollover commonly occurs when a vehicle skids and digs its tires into soft soil or hits a tripping mechanism such as a curb with a sufficiently large lateral velocity. On the other hand, the untripped rollover is induced by extreme maneuvers during critical driving situations, such as excessive speed during cornering, obstacle avoidance, and severe lane change maneuver. In these situations, the forces at the tire-road contact point are large enough to cause the vehicle to roll over. Furthermore, vehicle rollover may occur due to external disturbances such as side-wind and steering excitation. Therefore, it is necessary to investigate the dynamic stability and control of tripped and untripped vehicle rollover so as to avoid vehicle rollover accidents. In this book, different dynamic models are used to describe the vehicle rollover under both untripped and special tripped situations. From the vehicle dynamics theory, rollover indices are deduced, and the dynamic stabilities of vehicle rollover are analyzed. In addition, some active control strategies are discussed to improve the anti-rollover performance of the vehicle.

Modeling of Road Traffic Events Jerzy Kisilowski,Jarosław Zalewski,2022-01-01 This books reviews and brings readers up to date with the latest research knowledge on road traffic safety. It describes and discusses mathematical descriptions of the process of a motor vehicle crash and indicates the various factors that impact on collision models. It tackles also vehicle stability and shows how the forces generated in crashes result in different extents of post-accident repair. Mathematical models that simulate vehicle stability data are compared with those of real vehicles. Practical uses of the models are explained to readers. The book will be of interest to researchers in transport and vehicle technology well as automotive industry professionals.

French-language Road Cinema Gott Michael Gott,2016-05-31 Over the past two decades road cinema has become an increasingly popular form of expression for European directors. Focusing on a corpus of films from France, Belgium and Switzerland, including works by Ismael Ferroukhi, Bouli Lanners, Aki Kaurismaki and Jacqueline Audry amongst many

others, French-language Road Cinema contends that nowhere is the impulse to remap the spaces and identities of 'New Europe' more evident than in French-language cinema. Drawing on mobility studies, cultural geography and film theory, this innovative work sketches out the flexible yet distinctive parameters of contemporary French-language road cinema, and argues for an understanding of the 'road movie' not as a genre but as a thematic and formal template that crosses cinematic categories to bring together a wide array of films that narrate the movements of migrants, tourists and business executives.

The Dynamics of Vehicles on Roads and on Tracks Milan Apetaur,2021-07-29 This book deals with identification methods for vehicle system dynamics and dynamic interaction of vehicles with tracks and roads. It also deals with injury sequence and injury severity as the consequence of the dynamic response of the vehicle during and after collision.

Transitional Justice in Latin America Elin Skaar,Jemima Garcia-Godos,Cath Collins,2016-10-27 This book addresses current developments in transitional justice in Latin America - effectively the first region to undergo concentrated transitional justice experiences in modern times. Using a comparative approach, it examines trajectories in truth, justice, reparations, and amnesties in countries emerging from periods of massive violations of human rights and humanitarian law. The book examines the cases of Argentina, Brazil, Chile, Colombia, Guatemala, El Salvador, Paraguay, Peru and Uruguay, developing and applying a common analytical framework to provide a systematic, qualitative and comparative analysis of their transitional justice experiences. More specifically, the book investigates to what extent there has been a shift from impunity towards accountability for past human rights violations in Latin America. Using 'thick', but structured, narratives - which allow patterns to emerge, rather than being imposed - the book assesses how the quality, timing and sequencing of transitional justice mechanisms, along with the context in which they appear, have mattered for the nature and impact of transitional justice processes in the region. Offering a new approach to assessing transitional justice, and challenging many assumptions in the established literature, this book will be of enormous benefit to scholars and others working in this area.
