The Day After Roswell Philip Corso, 2012-12-11 Since 1947, the mysterious crash of an unidentified aircraft at Roswell, New Mexico, has fueled a firestorm of speculation and controversy with no conclusive evidence of its extraterrestrial origin -- until now. Colonel Philip J. Corso (Ret.), a member of President Eisenhower's National Security Council and former head of the Foreign Technology Desk at the U.S. Army's Research & Development department, has come forward to tell the whole explosive story. Backed by documents newly declassified through the Freedom of Information Act, Colonel Corso reveals for the first time his personal stewardship of alien artifacts from the crash, and discloses the U.S. government's astonishing role in the Roswell incident: what was found, the cover-up, and how these alien artifacts changed the course of 20th century history.

**The Truth about the UFO Crash at Roswell** Kevin D. Randle, Donald R. Schmitt, 1994 The true story of the crash of an alien spacecraft--with a crew of five--near Roswell, New Mexico, and the great lengths federal agencies went to keep the news from becoming public.

Grid Resource Management Jarek Nabrzyski, Jennifer M. Schopf, Jan Weglarz, 2012-12-06 Grid Resource Management: State of the Art and Future Trends presents an overview of the state of the field and describes both the real experiences and the current research available today. Grid computing is a rapidly developing and changing field, involving the shared and coordinated use of dynamic, multi-institutional resources. Grid resource management is the process of identifying requirements, matching resources to applications, allocating those resources, and scheduling and monitoring Grid resources over time in order to run Grid applications as efficiently as possible. While Grids have become almost commonplace, the use of good Grid resource management tools is far from ubiquitous because of the many open issues of the field, including the multiple layers of schedulers, the lack of control over resources, the fact that resources are shared, and that users and administrators have conflicting performance goals.

Space-Age Acronyms Reta C. Moser, 2012-12-06 Acronym agglomeration is an affliction of the age, and there are acronym addicts who, in their weakness, find it impossible to resist them. More than once in recent months my peers have cautioned me about my apparent readiness to use not only acronyms, but abbreviations, foreign isms, codes, and other cryptic symbols rather than common, ordinary American words. Many among us, though, either have not received or have chosen to ignore such advice. As a consequence, what we write and speak is full of mystery and confusion. It is then for the reader and listener and for the writer and speaker that Reta C. Moser has compiled this guide. Its effective application to the art of communication is urged. Such use should help avoid many of the misunderstandings involving terminology which occur daily. Although such misunderstandings are certainly crucial in humanistic and social situations, they are often of immediate import and the trigger to disaster in scientific, technical, and political situations. Some 15,000 acronyms and 25,000 definitions are provided (a 50- and 47 -percent increase over the 1964 edition!), with due credit to Miss Moser's diligence in making the compilation and with the acknowledgment that the acronymical phenomenon is very much with us. This edition, like the first, is certain to be of value to writers, librarians, editors, and others who must identify and deal with acronyms.

**The Employment of Negro Troops** Ulysses Lee, 2004-07 Ulysses Lee's *The Employment of Negro Troops* has been long and widely recognized as a standard work on the subject. Although revised and consolidated before publication, the study was written largely between 1947 and 1951. If the now much-cited title has an echo of an earlier period, that very echo testifies to the book's rather remarkable twofold achievement; that Lee wrote it when he did, well before the Civil Rights movement of the 1960s, and that is reputation - for authority and objectivity - has endured so well. This is a landmark study in military and social history. As a key source for understanding the integration of the Army, Dr. Lee's work eminently deserves a continuing readership.

**Guide to Air Force Historical Literature 1943-1983** Kenneth Schaffel, Anne Shermer, Jacob Neufeld, 2020-11-10 Historical bibliographies are among the strongest-selling titles in Nimble Books' public domain list for the simple reason that they are an excellent value for money. There is no better way to be confident that you know almost everything there is to know about a given body of historical literature. This reproduction, originally published by the Office of Air Force History of the United States Air Force in 1985, is according to the Foreword by Richard H. Kohn, then Air Force Historian, a comprehensive listing of histories, monographs, chronologies, and special studies issued by the Office of Air Force History and historical offices throughout the Air Force. It excludes the periodic (monthly, quarterly, semi-annual, annual) command and unit histories. The primary purpose of the Guide is to bring together all of the writings of the Air Force History Program

in one convenient bibliography. We believe this is a valuable resource for commanders and staffs, for it includes a wide variety of studies on how the Air Force carried out planning, operations, research, logistical activities and a host of other important operational and support functions in the past. These studies address a wide variety of issues and problems. They can provide insight into 'why things are the way they are,' as well as what worked and what did not, and the reasons why. Such information is invaluable to those responsible for today's plans and operations. At the very least, used wisely, the historical information in these studies will help Air Force people make informed decisions and avoid repeating past mistakes. Other bibliographies from Nimble Books include: Annotated Bibliography of the Space Shuttle (Two Volumes)] Fifty Years of Flight Research: An Annotated Bibliography of Technical Publications of NASA Dryden Flight Research Center, 1946-1996 Submarine Warfare in the 20th and 21st Centuries - A Bibliography Historical Bibliography of Sea Mine Warfare Light Infantry Forces: A Bibliography- Guide to Captured German Documents Torpedoes: A List of References in the New York Public Library
