How to Day Trade for a Living Andrew Aziz, 2016-07-28 Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In How to Day Trade for a Living, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone. You can learn how to beat Wall Street at its own game. And, as a purchaser of my book, you will also receive a membership in my community of

day traders at www.vancouver-traders.com. You can monitor my screen in real time, watch me trade the strategies explained in his book, and ask questions of me and other traders in our private chat room. I invite you to join me in the world of day trading. I'm a real person who you can connect with. I'm not just a photograph here on the Amazon site. I love what I do. You can follow my blog post under Author Updates on my Author page on Amazon. It's honest. You'll see I lose some days. You can read the reviews of my book. I know you will learn much about day trading and the stock market from studying my book. You can join at no cost and with no obligation my community of day traders at www.vancouver-traders.com. You can ask us questions. Practical, hands-on knowledge. That's How to Day Trade for a Living.

How to Day Trade Ross Cameron,2015-10-29 Success as a day trader will only come to 10 percent of those who try. It's important to understand why most traders fail so that you can avoid those mistakes. The day traders who lose money in the

market are losing because of a failure to either choose the right stocks, manage risk, and find proper entries or follow the rules of a proven strategy. In this book, I will teach you trading techniques that I personally use to profit from the market. Before diving into the trading strategies, we will first build your foundation for success as a trader by discussing the two most important skills you can possess. I like to say that a day trader is two things: a hunter of volatility and a manager of risk. I'll explain how to find predictable volatility and how to manage your risk so you can make money and be right only 50 percent of the time. We turn the tables by putting the odds for success in your favor. By picking up this book, you show dedication to improve your trading. This by itself sets you apart from the majority of beginner traders.

Trading Strategies Andrew Rich,2020-01-04 Are you eager to join the world of trading? Want to start making money without breaking a sweat? If yes, then keep reading... Would it not be great to have a successful business and be your own boss? Just sit back and watch your money grow as the business succeeds! Does this sound like a daydream? It might, but this dream is closer to reality than one might imagine. The world of trading is diverse and full of different possibilities and chances. One of the best things about the trading world is that there is a place for everyone. Whether you're a beginner or have been investing for years, have long or short-term goals, or simply just want to experiment a bit, you will definitely find something suitable for you. However, it is essential to understand that this isn't a get rich quick scheme where you're going to make millions overnight. You will first need to educate yourself about its different aspects, set your goals, and choose what you want to invest in. Becoming successful in the trading world requires hard work, dedication, and a proper understanding of its different aspects. Most people choose to keep their money in the bank to save it. A bank is an attractive option for people because it is safe. The buying and selling of stocks, however, involves risk. You could buy a stock today and the value of the stock could decline or worse; the company might go bankrupt. If a company goes out of business, then your shared ownership would be worthless, and all the money you had invested would be gone. On the other hand, if you choose the right stocks and buy them at the right time, then their value could go up. By the time you sell the stock, you will have made a profit. The advantage of investing in the stock, forex and options market, rather than investing in a bank is the chance to profit from your investment. When you keep your money in a bank, very little value is added to the money over time. Banks will pay interest rates, but nowadays interest rates are so low that they don't manage to keep up with inflation. Often, we associate inflation with the increase in the money supply, making things more expensive and our money less valuable. In

economics, inflation is the gradual increase in the prices of goods and services over time. Over time, things become more expensive which means the dollar amount to purchase x item increases. A small amount of inflation is good for the economy because it makes the loans you have to repay less expensive over time. But if we just keep our money sitting in the bank then the value of our money won't keep up with the rate of inflation. In this bundle, you will learn strategies of trading and investing for a living. A Practical Introduction to Day Trading Don Charles,2018-11-14 Many individuals enter financial markets with the objective of earning a profit from capitalizing on price fluctuations. However, many of these new traders lose their money in attempting to do so. The reason for this is often because these new traders lack any fundamental understanding of financial markets, they cannot interpret any data, and they have no strategy for trading. Trading in markets is really about deploying strategies and managing risks. Indeed, successful traders are those who have strategies which they have proved to be consistent in granting them more financial gains than financial losses. The purpose of this book is to help a potentially uninformed retail trader or inquisitive reader understand more about financial markets, and assist them in gaining the technical skills required to profit from trading. It represents a beginner's guide to trading, with a core focus on stocks and currencies.
